**APPROPRIATE ASSESSMENT SCREENING
REPORT FOR PLANNING APPLICATIONS**

Screening is used to determine if an AA is necessary by examining:

- If the plan / project is directly connected with / necessary to the management of the European site
- If the effects will be significant on a European site in view of its conservation objectives, either alone / in combination with other plans / projects.

Planning Application Ref. No.: DEC24/18

(A) DESCRIPTION OF PROJECT AND LOCAL SITE:			
Proposed development:	WHETHER OR NOT THE RENOVATION OF EXISTING DWELLING IS OR IS NOT DEVELOPMENT AND IS OR IS NOT EXEMPTED DEVELOPMENT		
Site location:	BOHERNAGRISNA, BALLYCUMER, CO. OFFALY R35 W308.		
Area:	N/A	Floor Area of Proposed Development:	N/A
Identification of nearby European Site(s):	2000 site(s): SAC 000571– Clara Bog		
Distance to European Site(s):	0.51km		
The characteristics of existing, proposed or other approved plans / projects which may cause interactive / cumulative impacts with the project being assessed and which may affect the European site:	None		
Is the application accompanied by an EIS?			No: v
(B) IDENTIFICATION OF THE RELEVANT European SITE(S):			
The reasons for the designation of the European site:	Semi-natural dry grasslands and scrubland facies on calcareous substrates (Festuco-Brometalia) (* important orchid sites) [6210] Active raised bogs [7110] Degraded raised bogs still capable of natural regeneration [7120] Depressions on peat substrates of the Rhynchosporion [7150] Bog woodland [91D0]		
The conservation objectives / qualifying interests of the site and the factors that contributes to the conservation value of the site: (which are taken from the Natura 2000 site synopses and, if applicable, a Conservation Management Plan; all available on www.npws.ie) (ATTACH INFO.)	https://www.npws.ie/sites/default/files/protected-sites/conservation_objectives/CO000572.pdf		
To restore the favourable conservation condition of Semi-natural dry grasslands and scrubland facies on calcareous substrates (Festuco-Brometalia) in Clara Bog SAC To restore the favourable conservation condition of Active raised bogs in Clara Bog SAC; The long-term aim for Degraded raised bogs still capable of natural regeneration is that its peat-forming capability is re-established; therefore, the conservation objective for this			

habitat is inherently linked to that of Active raised bogs (7110) and a separate conservation objective has not been set in Clara Bog SAC;
 Depressions on peat substrates of the Rhynchosporion is an integral part of good quality Active raised bogs (7110) and thus a separate conservation objective has not been set for the habitat in Clara Bog SAC;
 To maintain the favourable conservation condition of Bog woodland in Clara Bog SAC.

(C) NPWS ADVICE:

Advice received from NPWS over phone:	None received

(D) ASSESSMENT OF LIKELY SIGNIFICANT EFFECTS:

*(The purpose of this is to identify if the effect(s) identified could be significant – if **uncertain** assume the effect(s) are significant).*

If the answer is 'yes' to any of the questions below, then the effect is significant.
 (Please justify your answer. 'Yes' / 'No' alone is insufficient)

<p>Would there be... ... any impact on an Annex 1 habitat? (Annex 1 habitats are listed in Appendix 1 of AA Guidance).</p>	Not likely due to the location and type of development.
	The site is sufficient distance from the European site.
<p>... a reduction in habitat area on a European site?</p>	There will be no reduction in the habitat area.
	The site is sufficient distance from the European site.
<p>... direct / indirect damage to the physical quality of the environment (e.g. water quality and supply, soil compaction) in the European site?</p>	Not likely due to the location and type of development
	The site is sufficient distance from the European site.
<p>... serious / ongoing disturbance to species / habitats for which the European site is selected (e.g. because of increased noise, illumination and human activity)?</p>	Not likely due to the location and type of development
	The site is sufficient distance from the European site.

... direct / indirect damage to the size, characteristics or reproductive ability of populations on the European site?	Not likely due to the location and type of development
	The site is sufficient distance from the European site
Would the project interfere with mitigation measures put in place for other plans / projects. [Look at <i>in-combination effects</i> with completed, approved but not completed, and proposed plans / projects. Look at projects / plans within and adjacent to European sites and identify them]. Simply stating that there are no cumulative impacts' is insufficient.	No other plans known of in the vicinity of the site.
	The site is sufficient distance from the European site.
(E) SCREENING CONCLUSION:	
Screening can result in:	
1.	<i>AA is not required</i> because the project is directly connected with / necessary to the nature conservation management of the site.
2.	<i>No potential for significant effects / AA is not required.</i>
3.	<i>Significant effects are certain, likely or uncertain.</i> (In this situation seek a NIS from the applicant or reject the project. Reject if too potentially damaging / inappropriate.
Therefore, does the project fall into category 1, 2 or 3 above?	Category 2
Justify why it falls into relevant category above:	There would be no likely significant impact on European sites from the proposed development.
