Section 1 Introduction

1.1 Introduction and Legislative Context

This is the Strategic Environmental Assessment (SEA) Statement for the Edenderry Local Area Plan 2023-2029.

SEA is a systematic process of predicting and evaluating the likely environmental effects of implementing a plan, or other strategic action, in order to ensure that these effects are appropriately addressed at the earliest appropriate stage of decision-making on a par with economic and social considerations.

Directive 2001/42/EC of the European Parliament and of the Council of Ministers, of 27th June 2001, on the Assessment of the Effects of Certain Plans and Programmes on the Environment, referred to hereafter as the SEA Directive, introduced the requirement that SEA be carried out on plans and programmes which are prepared for a number of sectors, including land use. The SEA Directive was transposed into Irish Law through the European Communities (Environmental Assessment of Certain Plans and Programmes) Regulations 2004 and the Planning and Development (Strategic Environmental Assessment) Regulations 2004. The Regulations have been amended by the European Communities (Environmental Assessment of Certain Plans and Programmes) (Amendment) Regulations 2011 and the Planning and Development (Strategic Environmental Assessment) (Amendment) Regulations 2011.

1.2 Content of the SEA Statement

Where SEA is undertaken, the Regulations require that a Statement is made available to the public and the competent environmental authorities after the making of the Plan.

This Statement is referred to as an SEA Statement.

The SEA Statement is required to include information summarising:

- a) how environmental considerations have been integrated into the Plan;
- b) how the following have been taken into account during the preparation of the Plan:
 - the environmental report,
 - submissions and observations made to the planning authority on the Draft Plan and Environmental Report, and
 - any transboundary consultations (these are not relevant to this SEA).
- c) the reasons for choosing the Plan in the light of the other reasonable alternatives dealt with; and
- d) the measures decided upon to monitor the significant environmental effects of implementing the Plan.

1.3 Implications of SEA for the Plan

SEA has been undertaken on the Plan and the findings of the SEA are expressed in an Environmental Report, the first published version of which accompanied the Draft Plan on public display. The Environmental Report was updated in order to take account of changes to the original Draft Plan that were made on foot of submissions and recommendations in the submissions.

Offaly County Council have been provided with the findings of SEA output during their consideration of the Plan and before the Plan was adopted.

Section 2 How Environmental Considerations were integrated into the Plan

2.1 Overview

Environmental considerations were presented to the Council for its consideration through:

1. Consultations;
2. Communication of environmental sensitivities throughout the SEA process;
3. Appropriate Assessment;
4. Strategic Flood Risk Assessment;
5. Consideration of alternatives;
6. Integration of environmental considerations; and
7. Integration of individual SEA and AA provisions into the Plan.

All parts of the Plan-preparation process were informed by the SEA, AA and SFRA processes - this includes the preparation of the Draft Plan, Proposed Material Alterations and Further Modifications.

2.2 Consultations

As environmental authorities identified under the Planning and Development (SEA) Regulations, as amended, the following authorities were sent SEA scoping notices indicating that submissions or observations in relation to the scope and level of detail of the information to be included in the environmental report could be made to the Offaly County Council: Environmental Protection Agency; Department of Environment, Climate and Communications; Department of Agriculture, Food and the Marine; Department of Housing, Local Government and Heritage; Meath Council; Westmeath County Council; Roscommon County Council; Galway County Council; Tipperary County Council; Laois County Council; and Kildare County Council.

Detail on submissions made on foot of the SEA scoping notice is provided under Section 3.2.

Detail is also provided on submissions that were made on the Draft Plan and/or the SEA

Environmental Report while they were on public display (see Section 1.1).

2.3 Communication of environmental sensitivities throughout the SEA process

Environmental considerations were integrated into the Plan before it was placed on public display. Individual sensitivities that were considered by the Planning Team preparing the Plan included the following:

- European Sites (Special Areas of Conservation and Special Protection Areas);
- Other Ecological Designations;
- Status of Surface and Ground Waters;
- Various entries to the Water Framework Directive's Register of Protected Areas;
- Groundwater Vulnerability;
- Water Services Capacity, Performance and Demand;
- Cultural heritage (archaeological and architectural) sensitivities; and
- Landscape Designations.

A number of these sensitivities are mapped on Figures 2.1 to 2.3.

2.4 Appropriate Assessment

Appropriate Assessment (AA) Screening and Stage 2 AA have been undertaken alongside the Plan. The requirement for AA is provided under the EU Habitats Directive (Directive 1992/43/EEC).

The conclusion of the AA is that the Plan will not affect the integrity of the European Sites, alone or in combination with other plans or projects.¹

¹ Except as provided for in Article 6(4) of the Habitats Directive, viz. There must be: (a) no alternative solution available, (b)

The preparation of the Plan, SEA and AA has taken place concurrently and the findings of the AA have informed the SEA.

2.5 Strategic Flood Risk Assessment

A Strategic Flood Risk Assessment (SFRA) has been undertaken alongside the preparation of the Plan. The requirement for SFRA is provided under 'The Planning System and Flood Risk Management Guidelines for Planning Authorities' (Department of Environment and Office of Public Works, 2009) and associated Department of the Environment, Community and Local Government Circular PL2/2014.

The preparation of the Plan, SEA and SFRA has taken place concurrently and the findings of the SFRA have informed both the Plan and the SEA.

2.6 Consideration of Alternatives

Consideration of the environmental effects arising from a variety of different alternatives for the Plan (see Section 4) has contributed towards the protection and management of the environment within the Plan area.

2.7 Integration of environmental considerations into Zoning of the Plan

Environmental considerations were integrated into the Plan's zoning through an interdisciplinary approach.

Zoning has been applied in a way that primarily seeks to achieve sustainable and compact growth, taking into account the various requirements set out in the higher-level National Planning Framework, the Eastern and Midland Regional Spatial and Economic Strategy and the Offaly County Development Plan 2021-2027.

imperative reasons of overriding public interest for the plan to proceed; and (c) adequate compensatory measures in place.

The detailed County Development Plan preparation process undertaken by the Planning Department combined with specialist input from the SFRA process for the County Plan facilitated zoning that avoids inappropriate development being permitted in areas of high flood risk. Also taken into account were environmental sensitivities relating to ecology, cultural heritage, landscape and water, as well as the overlay mapping of environmental sensitivities.

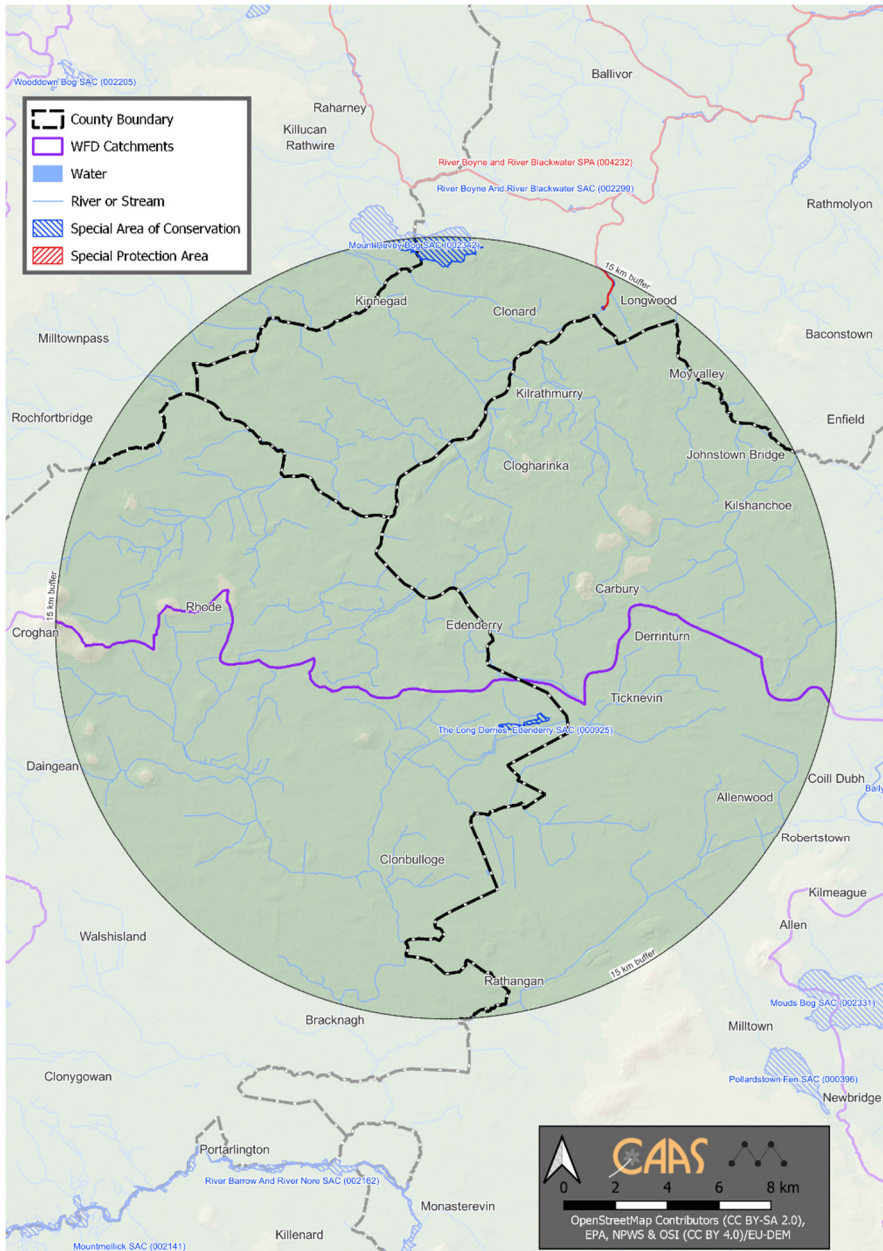

2.8 Integration of individual provisions into the text of the Plan

Various provisions have been integrated into the text of the Plan through the Plan-preparation and SEA, SFRA and AA processes. Both the Planning and the assessment teams contributed towards the mitigation which was developed over multiple iterations and was informed by, inter alia, various communications through the SEA, AA and SFRA processes.

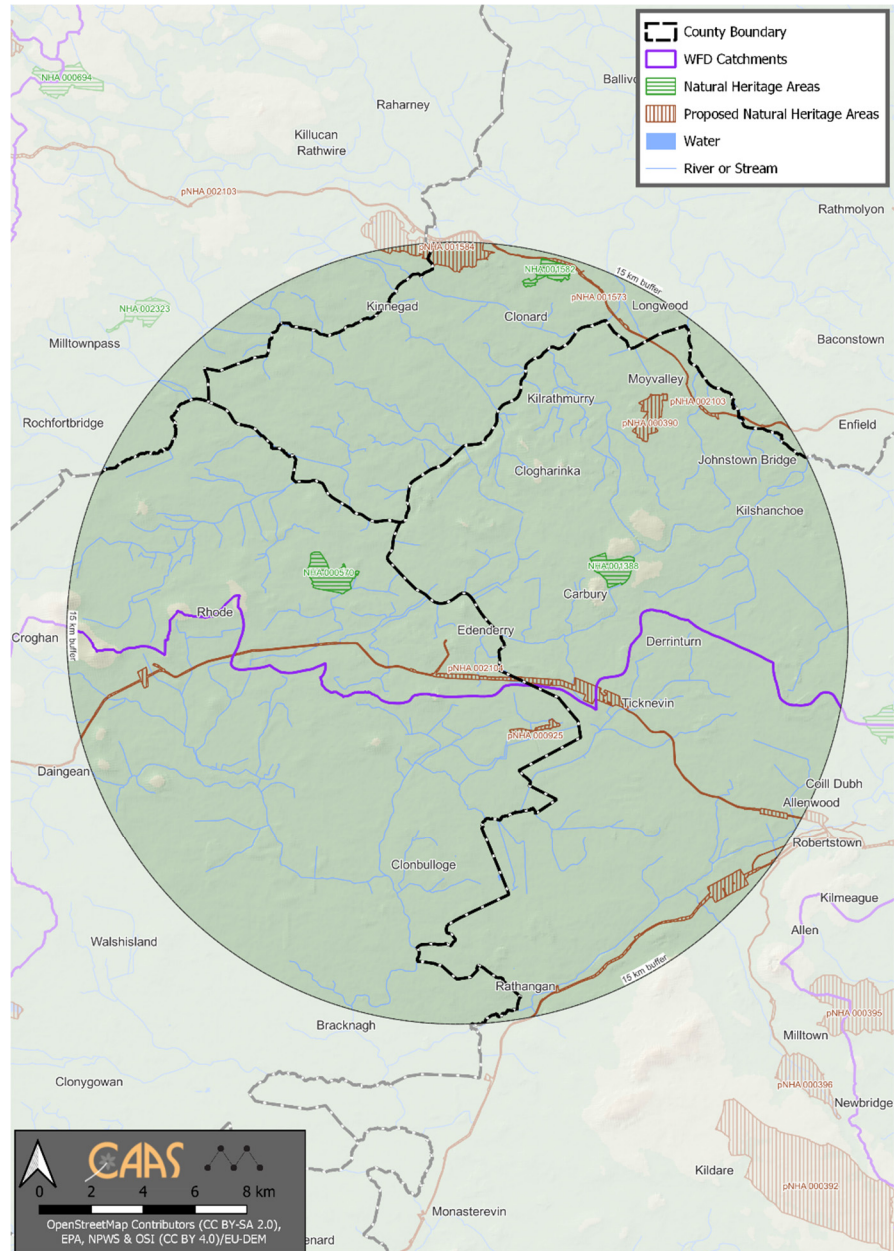

Table 2.1 links key mitigation measure(s) to the likely significant effects of implementing the Plan, if unmitigated. The measures generally benefit multiple environmental components i.e. a measure providing for the protection of biodiversity, flora and fauna could beneficially impact upon the minimisation of flood risk and the protection of human health, for example.

2.9 Integration of individual provisions into the text of the County Development Plan

In addition to the individual provisions integrated into the text of the Local Area Plan, individual provisions relating to environmental protection and management have been integrated into the existing Offaly County Development Plan 2021-2027. These measures, which must be complied with by development under the Local Area Plan, are identified alongside the Local Area Plan measures on Table 2.1.

European Sites within and within 15 km buffer of Plan area

NHAs and pNHAs within and within 15 km buffer of Birr Plan area

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
All	Various	<p>Strategic Aim 1: Economic Development To successfully fulfil Edenderry's role as a self-sustaining town by embracing the transition to a low carbon and climate resilient model of development while seeking to utilise and invest in the town's existing economic, social and environmental assets to generate sustainable economic development and job creation, thereby enhancing its status as the main business, service, employment, social, cultural, tourism and recreational hub for everyone in east Offaly and ensuring it is an attractive place to live, work and visit.</p> <p>Strategic Aim 2: Town Centre and Regeneration To sensitively and sustainably enhance the historic town centre through the provision of healthy place-making. To facilitate a competitive and healthy retail environment and to support the future vitality, diversity and viability of Edenderry. These aims will improve the attractiveness and functionality of Edenderry as a place in which to live, work and visit.</p> <p>Strategic Aim 4: Residential Deliver high quality housing in terms of design, scale, mix, tenure, sequence and density to reasonable match the requirements of the different categories of households which shall be constructed on the principles of universal design, life-long adaptability and energy efficiency, and developed in a manner which promotes compact growth and healthy place-making and is in line with the Core Strategy in the County Development Plan.</p> <p>Strategic Aim 6: Community Promote Edenderry as a town where people can live and work, with access to a range of community facilities and events that are vital for social inclusion and quality of life for all.</p> <p>Strategic Aim 10: Land Use Zoning Objectives To adhere to the land use zoning objectives</p>	<p>Chapter 8.6.4 Corridor & Route Selection Process The following Corridor and Route Selection Process will be undertaken for relevant new infrastructure, however this would not apply to national road schemes which are progressed in accordance with statutory processes and TII publications, including various TII Planning Guidelines for Assessment of Environmental Impacts that include headings such as "Constraints Study", "Route Corridor Selection" and "Environmental Impact Assessment": Stage 1 – Route Corridor Identification, Evaluation and Selection</p> <ul style="list-style-type: none"> Environmental constraints (including those identified in Section 4 of the accompanying SEA Environmental Report) and opportunities (such as existing linear infrastructure) will assist in the identification of possible route corridor options; Potentially feasible corridors within which infrastructure could be accommodated will be identified and these corridors assessed. The selection of the preferred route corridor will avoid constraints and meet opportunities to the optimum extent, as advised by the relevant specialists; and In addition to the constraints identified above, site-specific field data may be required to identify the most appropriate corridors. <p>Stage 2 – Route Identification, Evaluation and Selection</p> <ul style="list-style-type: none"> Potentially feasible routes within the preferred corridor will be identified and assessed. The selection of preferred routes will avoid constraints and meet opportunities to the optimum extent, as advised by the relevant specialists, taking into account project level information and potential mitigation measures that are readily achievable; In addition to the constraints identified above, site specific field data may be required to identify the most appropriate routes; and In addition to environmental considerations, the identification of route corridors and the refinement of route lines is likely to be informed by other considerations. <p>Chapter 11.5.2 Waste Management Construction Environment Management Plans (CEMPs) shall be prepared for larger scale projects and this requirement shall be assessed on a case by case basis as part of the development management process. Such plans shall incorporate relevant mitigation measures contained in any accompanying Environmental Impact Assessment Report or Appropriate Assessment and in this Development Plan. CEMPs shall typically provide details of intended construction practice for the proposed development, including where applicable:</p> <ul style="list-style-type: none"> Location and details of site compounds, refuse storage areas, construction site offices and staff facilities, site security fencing and hoardings, on-site staff car parking; Details of construction traffic - timing and routing, directional signage, measures to obviate queuing, alternative arrangements for pedestrians and vehicles, and measures to prevent the spillage or deposit of clay, rubble or other debris; Details of appropriate mitigation measures for noise, dust and vibration, and monitoring of such levels; Containment of all construction-related fuel and oil within specially constructed bunds to ensure that fuel spillages are fully contained; such bunds shall be roofed to exclude rainwater; Disposal of construction/demolition waste and details of how it is proposed to manage excavated soil, including compliance with 2006 Best Practice Guidelines on the Preparation of Waste Management Plans for Construction and Demolition Projects, Department of the Environment; A water and sediment management plan, providing for means to ensure that surface water runoff is controlled such that no silt or other pollutants enter local water courses or drains;

² Non-material changes to individual Plan provisions referenced in this report may be updated during the finalisation of the Plan, including numbering, formatting and graphic design.

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>contained in this Plan in the interests of orderly development and eliminating potential conflicts between incompatible land uses.</p> <p>Strategic Aim 11: Implementation and Monitoring To implement in conjunction with key stakeholders, the objectives of this Local Area Plan, with a particular focus on the key strategic objectives, and to monitor same.</p> <p>TCP-13 Incorporate Sustainable Urban Drainage Systems (SuDS) and other nature-based solutions in accordance with the 'Nature-based Solutions to the Management of Rainwater and Surface Water Runoff in Urban Areas – Best Practice Interim Guidance Document, 2022' and any subsequent editions. On key development sites, specifically the Blundell Masterplan site, integrated and area-based provision of SuDS and green infrastructure would be appropriate in order to avoid reliance on individual site by site solutions. Section 3.5 Sustainable Drainage Systems from the SFRA should be considered in this regard.</p> <p>TCP-06 Ensure that growth planned for Edenderry town over the life of the Plan occurs in a sustainable and sequential manner, characterised by a compact, consolidated and permeable pattern of development linked by sustainable modes of transport including a robust network of pedestrian and cycle routes.</p> <p>TCP-12 Support the development of sustainable low-carbon climate resilient communities and encourage a climate adaptation and mitigation approach to developments, which will enable regeneration.</p> <p>TCP-04 Encourage and facilitate the appropriate reuse and regeneration of derelict, vacant, backland and underutilised lands and buildings, including large rear gardens, in the town centre for retail, residential and other mixed uses, through the co-operation of adjoining landowners and/ or through legislative measures and / or by supporting the progression and delivery of projects funded by the Rural Regeneration and Development Fund and other</p>	<ul style="list-style-type: none"> • Details of a water quality monitoring and sampling plan; • If peat is encountered - a peat storage, handling and reinstatement management plan; • Measures adopted during construction to prevent the spread of invasive species (such as Japanese Knotweed); • Appointment of an ecological clerk of works at site investigation, preparation and construction phases; and • Details of appropriate mitigation measures for lighting specifically designed to minimise impacts to biodiversity, including bats. <p>DMS-107 (Undergrounding of Services) All services, including ESB, telephone and television cables shall be placed underground, where possible. Service buildings or structures shall be sited as unobtrusively as possible and must be screened. Proposals should demonstrate that environmental impacts including the following are minimised:</p> <ul style="list-style-type: none"> • Habitat loss as a result of removal of field boundaries and hedgerows (right of way preparation) followed by topsoil stripping (to ensure machinery does not destroy soil structure and drainage properties); • Short to medium-term impacts on the landscape where, for example, hedgerows are encountered; • Impacts on underground and underwater archaeology; • Impacts on soil structure and drainage; and • Impacts on surface waters as a result of sedimentation. <p>CAEP-23 (Reasonable Alternatives and Existing Infrastructural Assets) It is Council policy to require that environmental assessments should address reasonable alternatives for the location of new energy developments, and where existing infrastructural assets such as sub-stations, power lines and roads already exist within the proposed development areas, then such assets should be considered for sustainable use by the proposed development where the assets have capacity to absorb the new development.</p> <p>Chapter 12.1 (Environmental considerations and Limitations in the types of uses) There are a wide range of land uses identified under each of the Land Use Zoning Objectives. Proposals for development will need to demonstrate compliance with the various written provisions of the Plan, as relevant, including those relating to environmental protection and management. Environmental considerations, such as those related to elevated levels of flood risk or European site ecological designations, may limit the types of uses that may be possible at certain sites. Prospective applicants are encouraged to engage with the Planning Authority at the earliest opportunity to seek guidance as to the appropriateness of emerging proposals.</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>appropriate funds. This may include for the creation of new streets and / or cohesive developments.</p> <p>RP-01 Encourage the compact growth of Edenderry Town and undertake a town centre first approach to ensure that development proceeds sustainably and at an appropriate scale, density and sequence and in line with the County Core Strategy Table.</p> <p>RP-03 Encourage the appropriate redevelopment of brownfield and infill sites for residential and mixed uses within the existing built-up footprint of Edenderry Town.</p> <p>RP-08 That Edenderry, a Self-Sustaining Town, grows at a sustainable level in line with the Core Strategy Table and deliver consolidation and targeted 'catch up' investment in services, infrastructure, amenities and local employment in order to become more self-sustaining.</p> <p>RO-01 In line with the requirements of the National Planning Framework, ensure that at least 30% of all new housing development is delivered within the existing built-up footprint of Edenderry Town.</p> <p>CAP-06 Maintain existing green infrastructure in Edenderry and encourage and facilitate, in consultation with relevant stakeholders, the development of green infrastructure that recognises the synergies that can be achieved with regard to the following:</p> <ul style="list-style-type: none"> • Provision of open space amenities; • Sustainable management of water; • Protection and management of biodiversity; • Protection of cultural heritage; and • Protection of protected landscape sensitivities. 	
Biodiversity and flora and fauna	<p>Arising from both construction and operation of development and associated infrastructure:</p> <ul style="list-style-type: none"> • Loss of/damage to biodiversity in designated sites 	<p>Strategic Aim 5: Biodiversity and Green Infrastructure</p> <p>Protect and enhance Edenderry's natural assets of clean water, biodiversity, landscape, green infrastructure, natural heritage and agricultural land, while maintaining ecosystem services and improving resilience to climate change.</p> <p>TCP-16 Seek a survey of existing numbers of bats, swifts and swift/nests for planning applications for renovations, redevelopment or</p>	<p>Various Designated and Non-Designated Sites Policies and Objectives (BLP-01 to 07 and BLO-02 to 06)</p> <p>It is Council policy to protect, conserve, and seek to enhance the county's biodiversity and ecological connectivity.</p> <p>It is Council policy to conserve and protect habitats and species listed in the Annexes of the EU Habitats Directive (92/43/EEC) (as amended) and the Birds Directive (2009/147/EC), the Wildlife Acts 1976 (as amended) and the Flora Protection Orders.</p> <p>It is Council policy to support and co-operate with statutory authorities and others in support of measures taken to manage proposed or designated sites in order to achieve their conservation objectives.</p> <p>It is Council policy to protect and maintain the conservation value of all existing and future Natural Heritage Areas, proposed Natural Heritage Areas, Nature Reserves, Ramsar Sites, Wildfowl Sanctuaries and Biogenetic Reserves in the county.</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
	<p>(including European Sites and Wildlife Sites) and Annexed habitats and species, listed species, ecological connectivity and non-designated habitats; and disturbance to biodiversity and flora and fauna;</p> <ul style="list-style-type: none"> Habitat loss, fragmentation and deterioration, including patch size and edge effects; and Disturbance (e.g. due to noise and lighting along transport corridors) and displacement of protected species such as birds (e.g. swifts) and bats. 	<p>demolition of old buildings in Edenderry Town centre. Where bats and/or swifts are shown to be present, specific mitigation measures during and after construction shall be proposed.</p> <p>BGIP-01 Protect, conserve and enhance Edenderry's biodiversity and natural heritage that includes wildlife (flora and fauna), habitats and landscapes of importance to wildlife, especially along the River Boyne, Grand Canal and Blundell Park, which in-turn can contribute to climate action.</p> <p>BGIP-02 Prohibit any development that would be harmful to or that would result in a significant deterioration of habitats and/or disturbance of protected species within Edenderry and to support/co-operate with statutory authorities and others in support of measures taken to manage proposed or designated sites in order to achieve their conservation objectives.</p> <p>BGIP-03 Support the role that biodiversity and green infrastructure plays in the Plan Area in relation to ecosystem services along with climate change mitigation and adaptation.</p> <p>BGIP-04 Promote the protection and preservation of existing hedgerows and to encourage planting of native hedgerow and tree species.</p> <p>BGIP-05 To seek to ensure the sustainable and responsible management of fishing activities within the Boyne River, in collaboration with Inland Fisheries Ireland, with regard to the Salmonid River Regs (S.I. No. 293/1988) and the Habitats Directive in order to help maintain the conservation objectives for Salmon (<i>Salmo salar</i>), which is Qualifying Interest No. 1106 of the River Boyne and Blackwater SAC.</p> <p>BGIP-06 To seek to ensure the sustainable and appropriate management of water-based activities and developments along or within the River Boyne, which is hydrologically connected to the River Boyne and Blackwater SAC). This may include the preparation and implementation of visitor management plans and/or Appropriate Assessment under the Habitats Directive if there is a possibility that the activities/developments</p>	<p>It is Council policy to ensure that development does not have a significant adverse impact, incapable of satisfactory avoidance or mitigation, on plant, animal or bird species protected by law.</p> <p>It is Council policy to consult with the National Parks and Wildlife Service, and take account of any licensing requirements, when undertaking, approving or authorising development which is likely to affect plant, animal or bird species protected by law.</p> <p>It is Council policy to support the implementation of the National Biodiversity Action Plan 2017-2021 and the Offaly Heritage Plan Key Actions 2017-2021 and future editions in partnership with relevant stakeholders subject to available resources.</p> <p>It is Council policy to work with all state agencies to promote the development of all aspects of park management in the Slieve Bloom Mountains.</p> <p>It is an objective of the Council that no plans, programmes or projects giving rise to significant cumulative, direct, indirect or secondary impacts on European sites arising from their size or scale, land take, proximity, resource requirements, emissions (disposal to land, water or air), transportation requirements, duration of construction, operation, decommissioning or from any other effects shall be permitted on the basis of this Plan (either individually or in combination with other plans, programmes, etc. or projects).</p> <p>It is an objective of the Council that all projects and plans arising from this Plan will be screened for the need to undertake Appropriate Assessment under Article 6 of the Habitats Directive. A plan or project will only be authorised after the competent authority has ascertained, based on scientific evidence, Screening for Appropriate Assessment, and subsequent Appropriate Assessment where necessary, that:</p> <ol style="list-style-type: none"> The plan or project will not give rise to significant adverse direct, indirect or secondary effects on the integrity of any European site (either individually or in combination with other plans or projects); or The plan or project will have significant adverse effects on the integrity of any European site (that does not host a priority natural habitat type/and or a priority species) but there are no alternative solutions and the plan or project must nevertheless be carried out for imperative reasons of overriding public interest, including those of a social or economic nature. In this case, it will be a requirement to follow procedures set out in legislation and agree and undertake all compensatory measures necessary to ensure the protection of the overall coherence of Natura 2000; or The plan or project will have a significant adverse effect on the integrity of any European site (that hosts a natural habitat type and/or a priority species) but there are no alternative solutions and the plan or project must nevertheless be carried out for imperative reasons for overriding public interest, restricted to reasons of human health or public safety, to beneficial consequences of primary importance for the environment or, further to an opinion from the Commission, to other imperative reasons of overriding public interest. In this case, it will be a requirement to follow procedures set out in legislation and agree and undertake all compensatory measures necessary to ensure the protection of the overall coherence of Natura 2000. <p>It is an objective of the Council to ensure that the impact of development within or adjacent to national designated sites, Natural Heritage Areas, proposed Natural Heritage Areas, Ramsar Sites and Nature Reserves likely to result in significant adverse effects on the designated site is assessed by requiring the submission of an Ecological Impact Assessment prepared by a suitably qualified professional, which should accompany planning applications.</p> <p>It is an objective of the Council in accordance with Article 4(4) of the Birds Directive and Regulation 27(4) of the European Communities (Birds and Habitats) Regulations 2011-2015 to strive to avoid pollution or deterioration of bird habitats outside Special Protection Areas.</p> <p>It is an objective of the Council to take account of the objective and management practices proposed in any management or related plans for European Sites (SACs and SPAs) in and adjacent to the county published by the Department including the National Raised Bog Special Areas of Conservation (SACs) Management Plan 2017-2022 and any subsequent editions.</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>would negatively affect the Conservation Objectives of any of the Qualifying Interests of the River Boyne and Blackwater SAC.</p> <p>BGIO-01 Further develop an integrated and coherent Green Infrastructure network for the Plan Area by requiring the retention of substantial networks of green space in urban, urban fringe and adjacent countryside areas to serve the needs of communities now and in the future including the need to adapt to and mitigate climate change.</p> <p>BGIO-02 Integrate existing green infrastructure as shown in Figure 6.4 and potential GI projects as shown in Figure 6.13 as an essential component of all new developments and to discourage development that would fragment, damage or prejudice the integrity of the green infrastructure network.</p> <p>BGIO-03 Promote a network of pedestrian and cycle paths to enhance accessibility to the green infrastructure network, while ensuring that the design and operation of the routes responds to the ecological protection needs of each site, including the undertaking of Appropriate Assessment where relevant.</p> <p>BGIO-04 Provide a Linear park adjacent to the River Boyne at Kishowanny and to provide an eco-friendly looped walkway or nature trail along the river bank.</p> <p>BGIO-05 In conjunction with the appropriate prescribed bodies and local community groups, to investigate the feasibility of providing Wetland Amenity Area at locations shown on Figure 6.13 taking into account the environmental sensitivities of the site and Inland Fisheries Guidance document, Planning for Watercourses in the Urban Environment and to develop a strategy for the ongoing monitoring and management of ponds and wetland areas as appropriate, subject to resources.</p> <p>BGIO-08 Provide attractive and safe routes linking parks, open spaces and other related features such as cultural sites and heritage assets as an integral part of Green Infrastructure provision, where appropriate and feasible,</p>	<p>Various Policies and Objectives relating to Peatlands (BLP-14 to 18 and BLO-10 and 11)</p> <p>It is Council policy to protect the county's designated peatland areas and landscapes, including any historical walkways through bogs and to conserve their ecological, archaeological and cultural heritage and to develop educational heritage. It is Council policy to work with adjacent local authorities and relevant stakeholders in promoting a National Park designation for the peatlands in the midlands and a 'Regional Peatway' connecting natural and cultural attractions. It is Council policy to support the provision of outdoor pursuits, walking and cycling routes through the county's peatlands and network of industrial railways linking the River Shannon Blueway, Royal Canal, Grand Canal and Barrow Blueway across the midlands as outlined in the 'Major Cycling Destination in the Midlands of Ireland –Feasibility Study 2016', which is a priority of the 'Outdoor Recreation Plan State Lands and Waters' (2017).</p> <p>It is Council policy to support the National Parks and Wildlife Service in carrying out an EU LIFE fund supported raised bog restoration project in restoring the following Special Areas of Conservation sites in the county to favourable conservation status:</p> <ul style="list-style-type: none"> • Clara Bog; • Fербane Bog; • Mongan Bog; • Moyclare Bog; • Raheenmore Bog; and • Sharavogue Bog. <p>It is Council policy to support collaboration between Offaly County Council, Regional Transition Team and relevant stakeholders of a partnership approach to integrated peatland management for a just transition that incorporates the management, rehabilitation and restoration / re-wetting of significant tracts of peatlands in conjunction with appropriate developed after uses.</p> <p>Peatlands</p> <p>It is an objective of the Council to require the preparation and submission of a Hydrological Report/Assessment for significant developments within and in close proximity to protected raised bogs and to take account of same in the assessment of impacts on the integrity of peatland ecosystems.</p> <p>It is an objective of the Council to work with relevant stakeholders on suitable peatland sites in order to demonstrate best practice in sustainable peatland conservation, management and restoration techniques to promote their heritage and educational value subject to ecological impact assessment and appropriate assessment screening.</p> <p>Various Policies and Objectives relating to Waterways, Lakes and Wetlands (BLP-19 to 23 and BLO-12 and 13)</p> <p>It is Council policy to protect the landscape associated with the River Shannon, including the Callows and views of special interest, and also to encourage the development of Shannonbridge, Banagher and Shannon Harbour as focal points. It will also be Council policy to investigate the possibility of providing a Linear Park based on the River Shannon from Banagher to Meelick, which takes account of the sensitive ecological nature of the Callows area.</p> <p>It is Council policy to preserve riparian buffer strips free from development by reserving a minimum of 10 metres either side of all watercourses (measured from top of bank) with the full extent of the protection determined on a case by case basis by the Council, based on site specific characteristics and sensitivities.</p> <p>It is Council policy to promote clear span bridging structures as the preferred option for culverts Any development proposal requiring culverting should also document stream habitat lost and provide compensatory habitat where possible. Realignment of water courses should incorporate stream enhancement measures, as outlined in Office of Public Works Environmental Guidance. The Council will consult with Inland Fisheries Ireland in relation to riparian and instream works as appropriate.</p> <p>It is Council policy to promote the removal of historic culverts and infilling of watercourses.</p> <p>It is Council policy to consider the Waterways Corridor Study 2002 and protect the recreational, educational and amenity</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>including taking into account the findings of Appropriate Assessment.</p> <p>BGIO-10 Provide opportunities for Edenderry residents to engage in food production through allotments, community gardens and the provision of food foraging areas in new parks and Green Infrastructure proposals where appropriate.</p> <p>BGIO-11 Support the provision of pocket parks, community gardens and allotments as outlined in Figure 6.13.</p> <p>BGIO-12 Continue to promote and support re-wilding and pollinator initiatives within the Plan Area in support of the National Pollinator Plan and ensure that the management of the Council's open spaces and parks is pollinator-friendly, provides more opportunities for biodiversity, and is carried out without the use of pesticides where possible.</p> <p>BGIO-13 Develop linked corridors of small urban 'Miyawaki' native mini woodlands, a minimum of 100 m² in size, to capture carbon and encourage biodiversity in suitable existing built-up areas, in low grade public open space areas and other areas of zoned lands where deemed suitable and appropriate.</p> <p>BGIO-14 Encourage the provision of Biodiversity Zones/Pollination Zones in the locations outlined in Figure 6.13.</p> <p>BGIO-15 Protect and enhance the water quality of the River Boyne and surrounding drains that feed into this river to the north of Edenderry.</p> <p>CAP-07 Require, where the presence of invasive species is identified at the site of proposed development in Edenderry, to detail how it is proposed to be managed and controlled.</p> <p>CAP-06 Maintain existing green infrastructure in Edenderry and encourage and facilitate, in consultation with relevant stakeholders, the development of green infrastructure that recognises the synergies that can be achieved with regard to the following:</p> <ul style="list-style-type: none"> • Provision of open space amenities; • Sustainable management of water; 	<p>potential of navigational and non-navigational waterways within the county, such as the Grand Canal Corridor, towpaths and adjacent wetland landscapes, taking into account more recent heritage and environmental legislation (including the SEA Directive) and environmental policy commitments.</p> <p>It is an objective of the Council to maintain a riparian zone for larger and smaller river channels based on the Inland Fisheries Ireland updated guideline document, 'Planning for Watercourses in the Urban Environment, a Guide to the Protection of Watercourses through the use of Buffer Zones, Sustainable Drainage Systems, Instream Rehabilitation, Climate / Flood Risk and Recreational Planning'.</p> <p>It is an objective of the Council to (a) investigate the feasibility of and cooperate with relevant agencies in providing a Linear Park based on the River Shannon from Banagher to Meelick, which takes account of the sensitive ecological nature of the Callows area and (b) to support the development of an overall vision/strategy for the Shannon Callows in co-operation with all stakeholders to ensure that the area is appropriately managed at a landscape scale.</p> <p>Various Policies and Objectives relating to Trees, Forestry and Hedgerows (BLP-24 to 26 and BLO-12 to 18)</p> <p>It is Council policy to support the protection and management of existing networks of woodlands, trees and hedgerows which are of amenity or biodiversity value and/or contribute to landscape character, and to strengthen local networks.</p> <p>It is Council policy to encourage the planting of native species in all new residential developments (individual and multiple units) and as part of landscaping for commercial and industrial developments.</p> <p>It is Council policy to require, where practical, the management of mature trees, such as tree surgery instead of felling particularly where the trees contribute to amenity.</p> <p>It is an objective of the Council to preserve individual trees and groups of trees that are included in Table 4.13 and 4.14.</p> <p>It is an objective of the Council to consider the making of Tree Preservation Orders to protect trees and woodlands of high value.</p> <p>It is an objective of the Council to encourage the preservation and enhancement of native and semi-natural woodlands, groups of trees and individual trees, not listed in Table 4.13 and 4.14;</p> <p>(a) in particular, on the grounds of Country Houses, Gardens and Demesnes and on approaches to settlements in the county; and</p> <p>(b) as part of the development management process, require the planting of native, deciduous, pollinator friendly trees in all new developments where possible.</p> <p>It is an objective of the Council to encourage pursuant to Article 10 of the Habitats Directive, the management of features of the landscape, such as traditional field boundaries, important for the ecological coherence of the Natura 2000 network and essential for the migration, dispersal and genetic exchange of wild species.</p> <p>It is an objective of the Council to encourage the retention, wherever possible, of hedgerows and other distinctive boundary treatment in the county. Where removal of a hedgerow, stone wall or other distinctive boundary treatment is unavoidable, provision of the same type of boundary will be required of similar length and set back within the site in advance of the commencement of construction works on the site (unless otherwise agreed by the Planning Authority).</p> <p>BLO-19 (Green Infrastructure Strategy)</p> <p>It is an objective of the Council to require all new developments to identify, protect and enhance ecological features by making provision for local biodiversity (for example, through provision of swift boxes or towers, bat roost sites, green roofs, etc.) and provide ecological links to the wider Green Infrastructure network as an essential part of the design process.</p> <p>BLP-32 (All Ireland Pollinator Plan)</p> <p>It is Council policy to support the aims and objectives of the All Ireland Pollinator Plan 2021-2025 and any subsequent editions by delivering appropriate management actions as set out in their guidance documents.</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<ul style="list-style-type: none"> • Protection and management of biodiversity; • Protection of cultural heritage; and • Protection of protected landscape sensitivities. 	<p>Various Policies and Objectives relating to Invasive Species (BLP-34 and BLO-20 and 21) It is Council policy to continue to deliver and support measures for the prevention, control and/or eradication of invasive species within the county, and to seek details of how these species will be managed and controlled where their presence is identified. It is an objective of the Council to require, as part of the planning application process, the appropriate eradication/control of invasive species when identified on site or in the vicinity of a site, in accordance with Regulation 49 of the European Communities (Birds and Natural Habitats) Regulations 2011 to 2015. It is an objective of the Council to continue to maintain mapping identifying the location of invasive species in the county in conjunction with the National Biodiversity Data Centre.</p> <p>Policy and Objective relating to Light Pollution (ENVP-23 and ENVO-13) It is Council policy to require that the design of lighting schemes minimises the incidence of light pollution into the surrounding environment. New schemes shall ensure that there is no unacceptable adverse impact on residential or visual amenity and biodiversity in the surrounding area. It is an objective of the Council to seek to minimise the harmful effects of light pollution in the future provision of outdoor lighting, including investigating measures to improve the approach to street lighting and ensuring that new developments are lit appropriately and that environmentally sensitive areas are protected.</p> <p>Provisions relating to tourism TRP-04 It is Council policy to encourage tourism related developments inside existing settlements where the scale and size of the proposed development is appropriate and in keeping with the character of the settlement. TRP-05 It is Council policy that tourism related developments outside of settlements will be considered where there is proven sustainable need. The need to locate in a particular area must be balanced against the environmental impact of the development and the benefits to the local community and adhere to Section 13.9.8 of Chapter 13 Development Management Standards which address tourism and recreation TRP-08 It is Council policy to protect natural resources on which tourism is based through the enforcement of policies and relevant legislation in relation to protection of resources, architectural conservation areas, peatlands, water quality, species and populations of conservation concern and biodiversity. TRP-09 It is Council policy to seek to manage any increases in visitor numbers in order to avoid significant effects including loss of habitat and disturbance and impacts on existing infrastructure. Visitor / habitat management plans will be required for proposed tourism projects as relevant and appropriate. TRP-18 It is Council policy to support in conjunction with relevant landowners and recreational / tourism agencies, the maintenance of and enhanced access to the countryside, waterways, monuments, historic properties, for recreational and tourism purposes. Access should be planned and managed in a manner that protects environmental sensitivities, ecological corridors and the ability of local infrastructure to support increased tourism. Where significant effects cannot be ruled out to biodiversity, such as those within riparian zones, floodplains and peatlands, the subject development shall be subject to Ecological Impact Assessment.</p>
<p>Population and human health</p>	<ul style="list-style-type: none"> • Potential adverse effects arising from flood events. • Potential interactions if effects arising from environmental vectors. 	<p>Also see measures under other environmental components including Soil, Water and Air and Climatic Factors. EDP-08 Support and promote the development of economic and enterprise development and activity in a manner which contributes to the transition to a low carbon, climate resilient and environmentally sustainable county. EDP-09 Support the development and expansion of enterprise and employment within</p>	<p>Also see measures under other environmental components including Soil, Water and Air and Climatic Factors. ENVP-24 (Human Health) It is Council policy to assess, as relevant, proposals for development in terms of, inter alia, potential impact on existing adjacent developments, existing land uses and/or the surrounding landscape. Where proposed developments would be likely to have a significant adverse effect on the amenities of the area through pollution by noise, fumes, odours, dust, grit or vibration, or cause pollution of air, water and/or soil, mitigation measures shall be introduced in order to eliminate adverse environmental impacts or reduce them to an acceptable operating level. Application of this policy will take into account instances whereby activities are licensed by other bodies through other processes (such as Integrated Pollution Control Licensing or Industrial Emissions Licensing).</p>

			<p>appreciation of esker and geological heritage, where possible, subject to Article 6 of the Habitats Directive. It is an objective of the Council to consider, in consultation with the National Parks and Wildlife Service, Westmeath County Council, the Geological Survey of Ireland and others, the potential designation of the north Offaly esker landscape as a UNESCO Geopark, to promote the unique geological heritage of the area.</p>
Water	<ul style="list-style-type: none"> Potential adverse effects upon the status of water bodies and entries to the WFD Register of Protected Areas (ecological and human value), arising from changes in quality, flow and/or morphology. Increase in flood risk and associated effects with flood events. 	<p>Also see measures under other environmental components including Soil and Material Assets</p> <p>CAP-08 Incorporate Sustainable Urban Drainage Systems and other nature-based surface water drainage solutions as part of all proposed developments.</p> <p>CIP-07 Maintain and enhance the existing surface water drainage systems in Edenderry and to contribute towards protection and improvement of surface (including Weaver's Drain and the River Boyne) and ground water quality in accordance with the Water Framework Directive. Applications for development under the Plan must demonstrate that the proposal for development would not adversely affect a water body's ability to meet its objectives under the Water Framework Directive, individually as a result of the proposed development or cumulatively, in combination with other developments.</p> <p>CIP-08 Require that all development proposals demonstrate that appropriate Sustainable Urban Drainage Systems (SuDS) and other nature-based solutions are examined and provided.</p> <p>CIP-09 Manage flood risk in Edenderry in conjunction with the Office of Public Works and in accordance with the requirements of the Planning System and Flood Risk Management Guidelines for Planning Authorities (2009) and circular PL02/2014 (August 2014).</p> <p>BGIO-15 Protect and enhance the water quality of the River Boyne and surrounding drains that feed into this river to the north of Edenderry.</p> <p>Chapter 11 Land Use Zoning Objectives: Designations</p> <p>Constrained Land Uses</p> <p>Flood risk areas are represented by a 'Constrained Land Use' designation. This designation generally limits new development, but will facilitate existing development uses within these areas that may require small scale</p>	<p>Also see measures under other environmental components including Soil and Material Assets</p> <p>Various Policies and Objectives relating to Water Quality/Status (ENVP-01 to 08, ENVO-01 to 04, CAEP-30 and REDP-05)</p> <p>It is Council policy to ensure that the Water Framework Directive, the River Basin Management Plan and any subsequent Water Management Plans are fully considered throughout the planning process.</p> <p>It is Council policy to manage, protect and enhance surface water and ground water quality to meet the requirements of the Water Framework Directive.</p> <p>It is Council policy to support the implementation of the Water Framework Directive, the River Basin Management Plan and the Local Authority Waters Programme in achieving and maintaining at least good environmental status for all water bodies in the county. Development proposals shall not have an unacceptable impact on the water environment, including surface waters, groundwater quality and quantity, river corridors and associated woodlands.</p> <p>It is Council policy that in assessing applications for developments, that consideration is had to the impact on the quality of surface waters having regard to targets and measures set out in the River Basin Management Plan, and any subsequent local or regional plans.</p> <p>It is Council policy that all proposed development which may have an impact on a high status water quality site will require site specific assessment to determine localised pressures and demonstrate suitable mitigation measures in order to protect these sites.</p> <p>It is Council policy to promote and comply with the environmental standards and objectives established for:</p> <p>(i) Bodies of surface water, by the European Communities (Surface Waters) Regulations 2009, made to give effect to the measures needed to achieve the environmental objectives established for bodies of surface water by the European Water Framework Directive; and</p> <p>(ii) Groundwater, by the European Communities (Groundwater) Regulations 2010, made to give effect to the measures needed to achieve the environmental objectives established for groundwater by the European Water Framework and Groundwater Directives, for which standards and objectives are included in the River Basin Management Plan.</p> <p>It is Council policy to protect groundwater sources through the implementation of the Groundwater Protection Scheme and Source Protection Zones. Development proposals within these zones which have the potential to pose a risk to groundwater will be required to demonstrate that no reasonable alternative site is available and that groundwater quality will be protected to the satisfaction of the Council.</p> <p>It is Council policy to encourage the use of catchment-sensitive farming practices, in order to meet Water Framework Directive targets and comply with the River Basin Management Plan.</p> <p>It is an objective of the Council to ensure, through the implementation of the River Basin Management Plan, and any other associated legislation, the protection and improvement of all drinking water, surface water and ground waters throughout the county.</p> <p>It is an objective of the Council to protect through its regulatory controls and in conjunction with the Local Authority Waters Programme, water bodies with 'high ecological status'; to restore water bodies that have fallen below 'high ecological status'; to maintain water bodies at 'Good Status'; and to mitigate threats to water bodies identified as 'At Risk' i.e. 'Moderate and Poor Status'.</p> <p>It is an objective of the Council to protect both ground and surface water resources; to work with Irish Water to develop and implement Drinking Water Safety Plans to protect sources of public water supply and their contributing catchment; and to work with the National Federation of Group Water Schemes in respect of Source Protection Plans for Group Water</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>development such as small extensions. Development proposals within these areas shall be accompanied by a site specific flood risk assessment, carried out in accordance with The Planning System and Flood Risk Assessment Guidelines and Circular PL 2/2014 (or as updated), which shall assess the risks of flooding associated with the proposed development. Proposals shall only be considered favourably where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations and be in accordance with the proper planning and sustainable development of the area. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.</p> <p>Land Use Zoning Objective – Constrained Land Uses</p> <p>LUZO-13 Facilitate the appropriate management and sustainable use of flood risk areas designated as 'Constrained Land Use' in the zoning map in accordance with the provisions of the Planning System and Flood Risk Management Guidelines for Planning Authorities (2009), as amended, in consultation with the OPW. New development within this area is generally limited to water-compatible uses in Flood Zone A, and less vulnerable or water compatible uses in Flood Zone B (although these restrictions do not apply where a Plan-making Justification Test has been passed) and a detailed SSFRA will be required.</p>	<p>Schemes to protect these sources.</p> <p>It is an objective of the Council to comply with the Blue Dot Catchments Programme.</p> <p>It is Council policy to ensure that agricultural developments are designed and constructed in a manner that will ensure that groundwater watercourses and sources of potable water are protected from the threat of pollution in line with Water Quality Regulations and the requirements of the Water Framework Directive.</p> <p>CAEP-67 (Sustainable urban drainage systems and Surface Water)</p> <p>It is Council policy to minimise and limit the extent of hard surfacing and paving and require the use of sustainable urban drainage systems (SuDs) where appropriate, for new developments or for extensions to existing developments, in order to reduce the potential impact of existing and predicted flooding risks.</p> <p>Various Policies and Objectives relating to Flood Risk Management (CAEP-53 to 63, CAEO-11 to 12, LUZO-14, Section 12.6.1 Constrained Land Uses, DM Section 13.8.3 Flood Risk Assessment and DMO-106 Flood Risk Assessments)</p> <p>It is Council policy to support, in co-operation with the OPW, the implementation of the EU Flood Risk Directive, the Flood Risk Regulations (S.I. No. 122 of 2010) and the 'The Planning System and Flood Risk Management Guidelines for Planning Authorities (2009) and Department Circular P12/2014 or any updated / superseding version.</p> <p>It is Council policy to protect Flood Zone A and Flood Zone B from inappropriate development and direct developments/land uses into the appropriate Flood Zone in accordance with The Planning System and Flood Risk Management Guidelines for Planning Authorities 2009 (or any superseding document) and the guidance contained in Development Management Standard DMS-106. Where a development/land use is proposed that is inappropriate within the Flood Zone, then the development proposal will need to be accompanied by a Development Management Justification Test and site-specific Flood Risk Assessment in accordance with the criteria set out under with The Planning System and Flood Risk Management Guidelines for Planning Authorities 2009 and Circular PL2/2014 (as updated/superseded). In Flood Zone C, (See DMS-106 where the probability of flooding is low (less than 0.1%, Flood Zone C), site-specific Flood Risk Assessment may be required and the developer should satisfy themselves that the probability of flooding is appropriate to the development being proposed. The County Plan SFRA datasets (including Benefitting Lands mapping), emerging CFRAMS mapping (including National Indicative Fluvial mapping), and the most up to date CFRAM Programme climate scenario mapping should be consulted by prospective planning applicants and the planning authority in determining planning applications.</p> <p>It is Council policy to require a Site-specific Flood Risk Assessment (FRA) for all planning applications in areas at risk of flooding (fluvial, pluvial or groundwater), even for developments deemed appropriate in principle to the particular Flood Zone. The detail of these site-specific FRAs will depend on the level of risk and scale of development. A detailed site-specific FRA should quantify the risks, the effects of selected mitigation and the management of any residual risks. The assessments shall consider and provide information on the implications of climate change with regard to flood risk in relevant locations. The 2009 OPW Draft Guidance on Assessment of Potential Future Scenarios for Flood Risk Management (or any superseding document) and available information from the CFRAM Studies shall be consulted with to this effect.</p> <p>It is Council policy to ensure that applications to existing developments in flood vulnerable zones provide details of structural and non-structural risk management measures to include, but not be limited to specifications of the following - floor levels, internal layout, flood resilient construction, flood resistant construction, emergency response planning, access and egress during flood events.</p> <p>It is Council policy to work with other bodies and organisations, as appropriate, to help protect critical infrastructure, including water and wastewater, within the county, from risk of flooding. Any potential future variations to the Plan shall consider, as appropriate any new and/or emerging data, including, when available, any relevant information contained in the CFRAMS Flood Risk Management Plans and as recommended in the SFRA for the Plan.</p> <p>It is Council policy to have regard to the findings and recommendations of the current Strategic Flood Risk Assessment</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
			<p>prepared as part of the County Development Plan.</p> <p>It is Council policy to consult with the Office of Public Works (OPW) in relation to proposed developments in the vicinity of drainage channels and rivers for which the OPW are responsible, and the Council will retain a strip of 10 metres on either side of such channel where required, to facilitate access thereto.</p> <p>It is Council policy to consult, where necessary, with Inland Fisheries Ireland, the National Parks and Wildlife Service and other relevant agencies in the construction of flood alleviation measures in Offaly.</p> <p>It is Council policy to work with the OPW and other relevant Departments and agencies to implement the recommendations of the CFRAM programme to ensure that flood risk management policies and infrastructure are progressively implemented, and to also work with catchment-based Flood Planning Groups, (including where catchments go beyond the Council's administrative boundary) in the development and implementation of catchment-based strategies for the management of flood risk – including those relating to storage and conveyance.</p> <p>It is Council policy that where resources are available and subject to compliance with the Habitats and Birds Directives, the Council will contribute towards the improvement and / or restoration of the natural flood risk management functions of flood plains.</p> <p>It is Council policy to take account of and incorporate into local planning policy and decision making, including possible future variations to this plan, the recommendations of the Flood Risk Management Plans (FRMPs), including planned investment measures for managing and reducing flood risk.</p> <p>It is an objective of the Council to ensure that flood risk management is incorporated into the preparation of Local Area Plans in accordance with 'The Planning System and Flood Risk Management - Guidelines for Planning Authorities (2009).</p> <p>It is an objective of the Council to co-operate with the Office of Public Works (OPW) in the delivery of the Edenderry, Portarlinton and Rahan Flood Relief Schemes and other schemes that may be brought forward in the lifetime of this Plan.</p> <p><i>12.6.1 Constrained Land Uses</i></p> <p>Flood risk areas in settlement plans are represented by a 'Constrained Land Use' designation. This designation generally limits new development, but will facilitate existing development uses within these areas that may require small scale development such as small extensions. Development proposals within these areas shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with The Planning System and Flood Risk Assessment Guidelines and Circular PL 2/2014 (or as updated), which shall assess the risks of flooding associated with the proposed development. Proposals shall only be considered favourably where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations and be in accordance with the proper planning and sustainable development of the area. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.</p> <p>LUZO-14 Facilitate the appropriate management and sustainable use of flood risk areas designated as 'Constrained Land Use' on Settlement Plan zoning maps.</p> <p><i>13.8.3 Flood Risk Assessment</i></p> <p>The Council will have regard to the Planning System and Flood Risk Management Guidelines for Local Authorities (DEHLG and OPW 2009) when assessing planning applications. The key requirements for the management of development in areas at risk of flooding include:</p> <ul style="list-style-type: none"> • All development proposals within or incorporating areas at moderate to high risk of flooding will require site specific and appropriately detailed Flood Risk Assessments. • All development proposals within or incorporating areas at moderate or high risk of flooding will require the application of the Development Management Justification Test in accordance with the Planning System and

			<p>Flood Risk Management-Guidelines for Planning Authorities (DEHLG and OPW, 2009).</p> <ul style="list-style-type: none"> Any proposal that is considered acceptable in principle shall demonstrate the use of the sequential approach to inform the site layout and design of development. Proposals shall also demonstrate that mitigation and management measures can be put in place and that the development will not increase flood risk elsewhere. <p>DMO-106 Flood Risk Assessments</p>
<p>Air and Climatic Factors</p>	<ul style="list-style-type: none"> Potential conflict between development under the Plan and aiming to reduce carbon emissions in line with local, national and European environmental objectives. Potential conflicts between transport emissions, including those from cars, and air quality. Potential conflicts between increased frequency of noise emissions and protection of sensitive receptors. Potential conflicts with climate adaptation measures including those relating to flood risk management. 	<p>Strategic Aim 7: Climate Action Enhance climate adaptation and mitigation, and accelerate a transition to a low carbon, climate resilient and environmentally sustainable economy in Edenderry.</p> <p>EDP-24 Promote transformative projects with the support of Government funding streams for low-carbon focused projects.</p> <p>CAP-01 Support the transition of Edenderry to a competitive, low carbon, climate resilient and environmentally sustainable town by 2050, by way of reducing greenhouse gases, increasing renewable energy, and improving energy efficiency, particularly with regard to the updated renewable energy targets contained in Climate Action Plan 2023.</p> <p>CAP-02 Promote and encourage positive community and/or co-operative led climate action initiatives and projects in Edenderry that seek to reduce carbon emissions, improve energy efficiency, enhance green infrastructure and encourage awareness on climate change issues.</p> <p>CAP-03 Encourage innovation and facilitate the development of pilot schemes in Edenderry that support climate change mitigation and adaptation measures.</p> <p>CAP-04 Support the implementation of the Offaly County Climate Change Adaptation Strategy and promote Edenderry as a key driver of the transition to a low carbon economy within the east of the county.</p> <p>CAP-05 Support the effective and efficient use of land in Edenderry, prioritising compact growth through the development of brownfield/infill land in the built-up footprint of the town in preference to greenfield land.</p> <p>CAP-16 Support the roll out of the National Cycle Network and the connection of local cycling routes in the town to the external</p>	<p>Also refer to the overall approach to land use zoning and sustainability provided by the Plan. Various other Plan provisions including those under headings such as Peatlands, Compact Growth, Sustainable Mobility and Integrated Transport and Landuse Planning, Reasonable Alternatives & Existing Infrastructural Assets, Renewable Energy and Low Carbon District Heating.</p> <p>Various Policies and Objectives relating to Air Quality (ENVP-17 to 19 and ENVO-09 to 12) It is Council policy to manage air quality in accordance with relevant legislation and policy. It is Council policy to promote the preservation of best ambient air quality compatible with sustainable development in accordance with the EU ambient Air Quality and Cleaner Air for Europe (CAFE) Directive (2008/50/EC) and ensure that all air emissions associated with new developments are within Environmental Quality Standards as set out in the Air Quality Standards Regulations 2011, or any updated/superseding documents. It is Council policy to require activities likely to give rise to air emissions to implement measures to control such emissions and to undertake air quality monitoring. Application of this policy will take into account instances whereby activities are licensed by other bodies through other processes (such as Integrated Pollution Control Licensing or Industrial Emissions Licensing). It is an objective of the Council to reduce harmful emissions and achieve and maintain good air quality for the county. It is an objective of the Council to actively promote measures to reduce air pollution and combat climate change including promotion of energy efficient buildings, cleaner home heating, green infrastructure, active and public transport modes, electric vehicles and innovative design solutions. It is an objective of the Council to promote sustainable design and construction to help reduce emissions from the demolition and construction of buildings. It is an objective of the Council to work with relevant agencies to support local data collection in the development of air quality monitoring.</p> <p>Various Policies and Objectives relating to Noise (ENVP-20 to 22) It is Council policy to promote the implementation of the Environmental Noise Directive and associated regulations through the Offaly County Council Noise Action Plan 2018-2023 and any subsequent Plan. It is Council policy to promote the pro-active management of noise where it is likely to have significant adverse impacts on health and quality of life. Planning permission will not normally be granted for new uses / development or extensions of existing uses that produce significant and unacceptable levels of noise and/or vibration at site boundaries or within adjacent noise sensitive areas, especially residential areas. It is Council policy that noise sensitive development proposals located within proximity to a noise source, such as an existing or proposed national road, should include noise attenuation measures.</p> <p>Various Policies and Objectives relating to Climate Change Adaptation and Mitigation (CAEP-07 to 15 and CAEO-01 and CAEO-02) It is Council policy to support and facilitate European and national objectives for climate adaptation and mitigation as detailed in the following documents, taking into account other provisions of the Plan (including those relating to land use planning, energy, sustainable mobility, flood risk management and drainage);</p> <ul style="list-style-type: none"> Climate Action Plan (2019 and any subsequent versions); National Mitigation Plan 2017 (or subsequent editions); National Climate Change Adaptation Framework (2018 and any subsequent versions); Relevant provisions of any Sectoral Adaptation Plans prepared to comply with the requirements of the Climate

		<p>National Cycle Network.</p> <p>CAP-17 Support the implementation and provision of the decarbonisation projects listed in Table 8.1 in Edenderry during the lifetime of this Plan.</p> <p>CAO-01 Consider a variation of the development plan within a reasonable period of time, or to include such other mechanism, as may be appropriate, to ensure that the development plan will be consistent with the approach to climate action recommended in the revised Local Area Plan Guidelines when adopted or any other relevant guidelines.</p> <p>CAO-02 Source E.U. and national funding for projects that support Climate Change Adaptation and Mitigation.</p> <p>CAO-03 Provide LED lighting in all new lighting and retrofit of existing lighting throughout the town.</p>	<p>Action and Low Carbon Development Act 2015, including those seeking to contribute towards the National Transition Objective, to pursue, and achieve, the transition to a low carbon, climate resilient and environmentally sustainable economy by the end of the year 2050; and</p> <ul style="list-style-type: none"> Offaly Climate Change Adaptation Strategy. <p>It is Council policy to support the implementation and provision of the decarbonisation projects listed in Table 3.2 of the County Development Plan.</p> <p>It is Council policy to raise general awareness of issues associated with climate action and climate change mitigation and adaptation.</p> <p>It is Council policy to support local, regional, national and international initiatives for climate adaptation and mitigation and to limit emissions of greenhouse gases through energy efficiency and the development of renewable energy sources which make use of all natural resources, including publicly owned lands, in an environmentally acceptable manner.</p> <p>It is Council policy to support the transition to a competitive, low carbon, climate-resilient and environmentally sustainable economy by 2050, by way of reducing greenhouse gases, increasing renewable energy, and improving energy efficiency.</p> <p>It is Council policy to support the National Dialogue on Climate Action in an effort to increase awareness of climate change, behavioural change and adaptation actions and in doing so provide an ongoing platform for planning climate resilience with a focus on personal responsibility at all levels.</p> <p>It is Council policy to support the creation of a Sustainable Development Trust, through Green Offaly, a Public Participation Network Initiative, which facilitates, creates and assists in the delivery of Green Projects and Programmes by working in partnership with all sectors of the local community.</p> <p>It is Council policy to cooperate with the Climate Action Regional Office (CARO) in respect of adaptation and mitigation of greenhouse gas emissions, and future climate change adaptation strategies.</p> <p>CAEP-15 It is Council policy to support the enhancement of carbon sinks such as peatlands, forestry, and permanent grasslands, with consideration of in conjunction with other climate mitigation actions such as the re-wetting and restoration of cut away peatlands, where appropriate.</p> <p>CAEO-01 It is an objective of the Council to implement the current Climate Change Adaptation Strategy for County Offaly.</p> <p>CAEO-02 It is an objective of the Council to consider a variation of the development plan within a reasonable period of time, or to include such other mechanism, as may be appropriate, to ensure that the development plan will be consistent with the approach to climate action recommended in the revised Development Plan Guidelines as adopted or any relevant guidelines.</p> <p>Policies relating to Compact Growth, Sustainable Mobility and Integrated Transport and Landuse Planning (CAEP-21 and 22)</p> <p>It is Council policy to proactively encourage decarbonisation of local journeys by focusing on compact growth and reduced sprawl by targeting infill and brownfield lands in the existing built-up footprint of settlements.</p> <p>It is Council policy to improve walking and cycling connectivity within settlements and in particular with schools, town centres and employment areas, and to work with the National Trails Office, Coillte, the Department of Planning, Housing and Local Government, the Department of Transport, Tourism and Sport, and other relevant stakeholders, to improve on the existing level of infrastructure and facilities for walking and cycling in this regard.</p> <p>Policies relating to Green Infrastructure (CAEP-64)</p> <p>It is Council policy to maintain existing green infrastructure and encourage and facilitate, in consultation with relevant stakeholders, the development of green infrastructure that recognises the synergies that can be achieved with regard to the following:</p> <ul style="list-style-type: none"> Provision of open space amenities; Sustainable management of water;

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
			<ul style="list-style-type: none"> • Protection and management of biodiversity; • Protection of cultural heritage; and • Protection of protected landscape sensitivities. <p>Policies relating to Economic Development: Climate Action (REDP-15 to 18) REDP-15 It is Council policy to support the agricultural sector to employ green technologies in the provision of its goods and services, while taking measures to accelerate the transition towards a sustainable, low carbon and circular economy. REDP-16 It is Council policy to encourage the development of environmentally sustainable practices with a low carbon footprint, particularly agriculture, to ensure that development does not impinge on the visual amenity of the open countryside and that groundwater, watercourses, wildlife habitats and areas of ecological importance are protected from the threat of pollution. REDP-17 It is Council policy to support the development of renewable energy in rural areas, where it is considered appropriate i.e. where it is demonstrated that such development would not result in significant environmental effects. Such development will be assessed on a case-by-case basis. REDP-18 It is Council policy to encourage state and private afforestation, both native broadleaf and coniferous species, in appropriate locations, in co-operation with Coillte and the Forest Service and in line with national policy and Forest Service Guidelines. In addition, it is policy to encourage the Forest Service to avoid a proliferation of new forest road entrances, particularly in Areas of High Amenity.</p> <p>Chapter 7: Retail and Town Centre Strategy and Regeneration (Traffic and Transport Assessment) A Traffic and Transport Assessment (TTA) must examine the traffic and transport impacts of a proposed development, incorporating any subsequent measures necessary to ensure roads and junctions and other transport infrastructure in the vicinity of the development are adequate to accommodate the proposed development without causing additional delays to existing and future road based traffic. A TTA is important in demonstrating how to encourage a shift towards sustainable travel modes by those using the retail development in question. The TTA must also address urban design impacts of the proposed public and private transport proposals. A TTA will be required for retail developments over a threshold of 1,000sq.m. gross floorspace; and, at the discretion of the Planning Authority, a TTA may be required for retail developments below this threshold.³</p>
Material Assets	<ul style="list-style-type: none"> • Failure to provide adequate and appropriate waste water treatment infrastructure and capacity ensures the mitigation of potential conflicts). • Failure to adequately treat surface water run-off that is 	Also see measures under CEMP requirement, other environmental components including Population and Human Health and various Land Use and Phasing provisions from the Plan. Strategic Aim 8: Critical Infrastructure Promote facilitate the timely provision of infrastructure and utilities that will support sustainable socioeconomic growth and protect the quality of the environment of the town in a low carbon manner. Strategic Aim 9: Planning and Infrastructural Assessment To phase new development to ensure that it occurs in a sequential and efficient manner and in tandem with the delivery of supporting physical and social infrastructure. CAP-09 Encourage development proposals that	Also see measures under CEMP requirement, other environmental components including Population and Human Health and various Land Use and Phasing provisions from the Plan. Various Policies and Objectives relating to Water Services and Surface Water (WSP-01 to 25 and WSO-02 to 09) WSP-01 It is Council policy to ensure the efficient and sustainable use and development of water resources and water services infrastructure in order to manage and conserve water resources in a manner that supports a healthy society, economic development requirements, a cleaner environment and climate change mitigation. WSP-02 It is Council policy to liaise and co-operate with Irish Water in the implementation and delivery of the 'Water Services Strategic Plan' (2015, under review in 2020), the 'Irish Water Business Plan 2015-2021', the 'Irish Water National Water Resources Plan' (expected in 2021) and the 'Irish Water Investment Plan 2020-2024' (or any amendment thereof) and other relevant investment works programmes of Irish Water, to provide infrastructure to service settlements in accordance with the Council's Core Strategy and Settlement Strategy. WSP-03 It is Council policy to work in conjunction with Irish Water to protect existing water supply and wastewater infrastructure, to maximise the potential of existing capacity and to facilitate the timely delivery of new water supply and wastewater infrastructure to facilitate future growth in accordance with the Council's Core Strategy and Settlement Strategy. WSP-04 It is Council policy to require developments to connect to public wastewater infrastructure and public water

Where a CEMP is required, it shall be prepared in accordance with the criteria set out in Section 11.5.2 of this Plan.</p> <p>ENVO-05 It is an objective of the Council to implement the Eastern-Midlands Regional Waste Management Plan 2015-2021; the Council's Litter Management Plan and Waste Bye-Laws.</p> <p>Chapter 11.5.2 Waste Management (Construction and Environmental Management Plan)</p> <p>Construction Environment Management Plans (CEMPs) shall be prepared for larger scale projects and this requirement shall be assessed on a case by case basis as part of the development management process. Such plans shall incorporate relevant mitigation measures contained in any accompanying Environmental Impact Assessment Report or Appropriate Assessment and in this Development Plan. CEMPs shall typically provide details of intended construction practice for the proposed development, including where applicable:</p> <ul style="list-style-type: none"> • Location and details of site compounds, refuse storage areas, construction site offices and staff facilities, site security fencing and hoardings, on-site staff car parking; • Details of construction traffic - timing and routing, directional signage, measures to obviate queuing, alternative arrangements for pedestrians and vehicles, and measures to prevent the spillage or deposit of clay, rubble or other debris; • Details of appropriate mitigation measures for noise, dust and vibration, and monitoring of such levels; • Containment of all construction-related fuel and oil within specially constructed bunds to ensure that fuel spillages are fully contained; such bunds shall be roofed to exclude rainwater; • Disposal of construction/demolition waste and details of how it is proposed to manage excavated soil, including compliance with 2006 Best Practice Guidelines on the Preparation of Waste Management Plans for Construction and Demolition Projects, Department of the Environment; • A water and sediment management plan, providing for means to ensure that surface water runoff is controlled such that no silt or other pollutants enter local water courses or drains; • Details of a water quality monitoring and sampling plan; • If peat is encountered - a peat storage, handling and reinstatement management plan; • Measures adopted during construction to prevent the spread of invasive species (such as Japanese Knotweed); • Appointment of an ecological clerk of works at site investigation, preparation and construction phases; and • Details of appropriate mitigation measures for lighting specifically designed to minimise impacts to biodiversity, including bats.

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>Selection Process.</p> <p>CIO-06 To reallocate corresponding roadspace within Edenderry to walking, cycling and public transport to accompany / occur concurrently with the provision of additional roadspace capacity under CIO-05. This may take the form of removing traffic from streets, removing lanes of traffic, narrowing carriageways, traffic management measures, or removing on-street parking to provide cycle tracks or widened footpaths.</p> <p>CIO-07 Support and work in cooperation with Uisce Éireann to upgrade Edenderry Wastewater Treatment Plan.</p>	<p>DMS-82 (Tourist Facilities)</p> <p>Tourist and recreation facilities, in particular accommodation, shall be generally located within towns and villages unless;</p> <ul style="list-style-type: none"> • A comprehensive justification of the need for the development by its nature and space requirements to be located outside towns and villages, for example, golf courses, swimming, angling, sailing/boating, pier/marina development, water sports, equestrian and pony trekking routes, adventure/interpretative centres and associated ancillary uses, tourist related leisure facilities including walking and cycling; • Evidence that the proposed development will not have an adverse impact upon the scenic value, heritage value and the environmental, ecological or conservation quality of primary tourism asset(s) and its their general environment; • Evidence that potential environmental effects of a likely increase in tourists/tourism-related traffic volumes in particular locations/along particular routes have been considered and mitigation measures proposed. Such a consideration should include potential impacts on existing infrastructure (including drinking water, wastewater, waste and transport) resulting from tourism proposals; • Compliance with development management standards set out in this chapter; and • Evidence that, where feasible, existing ruinous or disused buildings or existing heritage buildings have been re-used to maximum potential. <p>This list is not exhaustive and the Council may consider other requirements contained in the chapter on a case by case basis with planning applications should the need arise.</p>
Cultural Heritage	Potential effects on protected and unknown archaeology and protected architecture arising from construction and operation activities.	<p>Strategic Aim 3: Built Heritage</p> <p>To protect, conserve and manage Edenderry's buildings, areas, structures, sites and features of special architectural, historical, archaeological, artistic, cultural, scientific, social or technical interest, by promoting the understanding, enhancement and appropriate development of these assets in order to instigate regeneration of the town.</p> <p>TCP-08 Further improve the streetscape and public realm in Edenderry town centre by undergrounding existing cables and improving pavements and street furniture in particular</p> <p>CAP-06 Maintain existing green infrastructure in Edenderry and encourage and facilitate, in consultation with relevant stakeholders, the development of green infrastructure that recognises the synergies that can be achieved with regard to the following:</p> <ul style="list-style-type: none"> • Provision of open space amenities; • Sustainable management of water; • Protection and management of biodiversity; • Protection of cultural heritage; and • Protection of protected landscape sensitivities. <p>BHP-01 Encourage the rehabilitation, renovation, climate-proofing and re-use of existing protected structures, where appropriate,</p>	<p>Various Policies and Objectives relating to Protected Structures (BHP-01 to 11 and BHO-01 and 02)</p> <p>It is Council policy to ensure the protection, sympathetic and sensitive modification, alteration, extension or reuse of protected structures or parts of protected structures, and the immediate surrounds included and proposed for inclusion in the Record of Protected Structures that are of special architectural, historical, archaeological, artistic, cultural, scientific, social or technical interest, together with the integrity of their character and setting.</p> <p>It is Council policy to ensure the protection of the curtilage of protected structures or proposed protected structures and to prohibit inappropriate development within the curtilage or attendant grounds of a protected structure which would adversely impact on the special character of the protected structure including cause loss of or damage to the special character of the protected structure and loss of or damage to, any structures of architectural heritage value within the curtilage of the protected structure.</p> <p>It is Council policy to promote best practice and the use of skilled specialist practitioners in the conservation of, and any works to, protected structures. Method statements should make reference to the Department of Culture, Heritage and the Gaeltacht's Advice Series on how best to repair and maintain historic buildings.</p> <p>It is Council policy to favourably consider the change of use of any structure included on the Record of Protected Structures provided such a change of use does not adversely impact on its intrinsic character and is in accordance with the proper planning and sustainable development of the area.</p> <p>It is Council policy to actively encourage uses that are compatible with the character of protected structures.</p> <p>It is Council policy to retain where practicable a protected structure which has been damaged by fire, and to retain those elements of that structure that have survived (either in whole or in part) and that contribute to its special interest.</p> <p>It is Council policy to prohibit the demolition of any protected structure unless the Council is satisfied that exceptional circumstances exist. The demolition of a protected structure with the retention of its façade will likewise not generally be permitted.</p> <p>It is Council policy to require an Architectural Heritage Assessment Report, as described in Appendix B of the Architectural Heritage Protection, Guidelines for Planning Authorities, Department of Culture, Heritage and the Gaeltacht (2013), to accompany all applications involving a protected structure.</p> <p>It is Council policy to advise owners of protected structures in preparation of funding applications under Built Heritage Scheme of the Historic Structures Fund.</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>over the demolition of same and new-build on-site.</p> <p>BHP-02 Encourage the rehabilitation, renovation, climate-proofing and re-use of existing vernacular structures that are not listed on the Record of Protected Structures, over the demolition of same and new-build on-site.</p> <p>BHP-03 Protect and enhance the urban form of Edenderry including the character of the streetscape of JKL Street, O'Connell Square, and vistas.</p> <p>BHP-04 Protect all structures in Edenderry that are listed in the County Offaly Record of Protected Structures that are of special architectural, historical, archaeological, artistic, cultural, scientific, social or technical interest in Edenderry.</p> <p>BHP-05 Ensure that all applications pertaining to the re-development of buildings that include features such as vernacular doorways and archways include a detailed methodology, prepared by a suitably qualified person, for the repair and maintenance of these features.</p> <p>BHP-06 Encourage contemporary development within Edenderry where the applicant can successfully demonstrate that any proposal will not negatively detract from the special character of the existing built environment.</p> <p>BHP-07 Ensure that full consideration is given to the protection of archaeological heritage when undertaking, approving or authorising development in order to avoid unnecessary conflict between development and the protection of archaeological heritage.</p> <p>BHP-08 Have regard to the Zones of Archaeological Potential as shaded on Figure 4.2 to ensure that planning applications are referred to the appropriate prescribed bodies.</p> <p>BHP-09 Protect the historical burial grounds within Edenderry town and encourage their maintenance in accordance with conservation principles.</p> <p>BHO-01 Secure, where feasible and appropriate, the protection of the character of the existing original carriage archways/access-</p>	<p>It is Council policy to ensure that in the event of a planning application being granted for development within the curtilage of a protected structure, the proposed works to the protected structure should occur, where appropriate, in the first phase of the development to prevent endangerment, abandonment and dereliction of the structure.</p> <p>It is Council policy to ensure that measures to upgrade the energy efficiency of Protected Structures and historic buildings are sensitive to traditional construction methods and materials and do not have a detrimental physical, aesthetic or visual impact on the structure. They should follow the principles and direction given in the Department of Arts, Heritage and the Gaeltacht's publication Energy Efficiency in Traditional Buildings.</p> <p>It is an objective of the Council to review the Record of Protected Structures on an on-going basis and make additions, deletions and corrections as appropriate over the period of this Plan.</p> <p>It is an objective of the Council to prepare a Buildings at Risk Register to prevent the endangerment of Protected Structures.</p> <p>Various Policies and Objectives relating to Architectural Conservation Areas (BHP-12 to 14 and BHO-03)</p> <p>It is Council policy to encourage the retention of original windows, doors, renders, roof coverings, street furniture and other significant features of historic buildings and landscape features within Architectural Conservation Areas.</p> <p>It is Council policy to proactively promote conservation through the Planning and Development Act 2000 (as amended), the Built Heritage Investment Scheme and other schemes available to the Council.</p> <p>It is Council policy to preserve the character of Geashill Architectural Conservation Area (ACA) and any future ACA's in County Offaly by ensuring that any new development within or contiguous to the ACA is sympathetic to the character of the area and that the design is appropriate in terms of scale, height, plot density, layout, materials and finishes having regard to the advice given in the Statements of Character for each area.</p> <p>It is an objective of the Council to investigate the designation of further Architectural Conservation Areas at appropriate locations throughout the county.</p> <p>Various Policies and Objectives relating to Vernacular Buildings (BHP-15 to 21 and BHO-04)</p> <p>It is Council policy to encourage the protection, retention, appreciation and appropriate revitalisation of the vernacular heritage of Offaly.</p> <p>It is Council policy to consider the guidance in "The Thatched Houses of Kildare" and "Reusing Farm Buildings, A Kildare Perspective" published by Kildare County Council in assessing planning applications in County Offaly relating to thatched cottages and traditional farm buildings.</p> <p>It is Council policy to preserve the character and setting (for example, gates, gate piers and courtyards) of vernacular buildings where deemed appropriate by the planning authority.</p> <p>It is Council policy to seek the repair and retention of traditional timber and/or rendered shop fronts and pub fronts, including those that may not be protected structures.</p> <p>It is Council policy to communicate and work with owners of thatch buildings regarding the availability of conservation grants and funding.</p> <p>It is Council policy to encourage where appropriate the covering of thatch with metal, as a measure for the protection of buildings which are unoccupied and showing signs of considerable distress.</p> <p>It is Council policy to support proposals to refurbish vernacular structures that are in a run down or derelict condition, provided that;</p> <ul style="list-style-type: none"> • Appropriate traditional building materials and methods are used to carry out repairs to the historic fabric; and • Proposals for extensions to vernacular structures are reflective and proportionate to the existing building and do not erode the setting and design qualities of the original structure which make it attractive. <p>It is an objective of the Council to identify and retain good examples of vernacular architecture and historic street furniture in situ, for example, cast-iron post boxes, water pumps, signage, street lighting, kerbing and traditional road and street surface coverings.</p> <p>Various Policies and Objectives relating to Industrial Heritage (BHP-22 to 27)</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
		<p>ways to the rear of existing properties.</p> <p>BHO-02 Secure, where feasible, the protection of the character of structures of interest, which are part of the town's milling and distilling heritage.</p>	<p>It is Council policy to protect the industrial heritage of Offaly, including mills, historic industrial buildings, canals and historic bridges.</p> <p>It is Council policy to utilise the information provided within Mills of County Offaly: An Industrial Heritage Survey (2009) when assessing development proposals for surviving industrial heritage sites.</p> <p>It is Council policy to protect and enhance the built and natural heritage of the Grand Canal and ensure that development within its vicinity is sensitively designed and does not have a detrimental effect on the character of the canal, its built elements and its natural heritage values and that it adheres to the Waterways Ireland's Heritage Plan 2016-2020.</p> <p>It is Council policy to encourage appropriate change of use and reuse of industrial buildings, provided such a change does not seriously impact on the intrinsic character of the structure and that all works are carried out in accordance with best conservation practice.</p> <p>It is Council policy to seek the retention and appropriate repair/maintenance of the historic bridges and harbours of the county whether they are protected structures or not.</p> <p>It is Council policy to restrict vehicular access onto public roads that were formerly towpaths and any development permitted with access off a towpath must be screened effectively with trees and hedging. In relation to planning applications for housing in the open countryside with access proposed off towpaths, applicants must demonstrate compliance with Policy SSP-27 as towpaths are located within Natural Heritage Areas and Areas of High Amenity.</p> <p>Various Policies and Objectives relating to Country Houses, Gardens and Demesnes (BHP-28 to 30)</p> <p>It is Council policy to encourage the protection, conservation, promotion and enhancement of Country Houses, Gardens and Demesnes in the county and support public awareness, enjoyment of and access to these sites where appropriate.</p> <p>It is Council policy to encourage the conservation, preservation, restoration and protection in their original setting of mausoleums and monuments: follies, grottoes; garden buildings and other structures of particular beauty or historic, environmental, architectural or industrial significance.</p> <p>It is Council policy to discourage development that would lead to a loss of, or cause damage to, the character, the principle components of, or the setting of Country</p> <p>Houses, Gardens and Demesnes (BHP-31)</p> <p>It is Council policy to consider the "Guidance Notes for the Appraisal of Historic Gardens, Demesnes, Estates and their Settings" published by Cork County Council 2006 in the appraisal and description of the impacts of proposed developments in County Offaly within or in close proximity to country houses and demesnes on historic designed landscapes, demesnes and gardens.</p> <p>Various Provisions relating to Archaeological Heritage (BHP-33 to 40 and BHO-05)</p> <p>It is Council policy to support and promote the protection and appropriate management and sympathetic enhancement of the county's archaeological heritage within the Plan area, in particular by implementing the Planning and Development Act 2000 (as amended) and the National Monuments Act 1930 (as amended).</p> <p>It is Council policy to seek to promote awareness of and access to archaeological sites in the county where appropriate.</p> <p>It is Council policy to consult with the National Monuments Service of the Department of Culture, Heritage and the Gaeltacht (DCHG) in relation to archaeological sites within and/or adjoining a proposed development.</p> <p>It is Council policy to facilitate the identification of important archaeological landscapes in the county.</p> <p>It is Council policy that any development that may, due to its size, location or nature, have implications for archaeological heritage (including both sites and areas of archaeological potential / significance) shall be subject to an archaeological assessment. When dealing with proposals for development that would impact upon archaeological sites and/or features, there will be presumption in favour of the 'preservation in situ' of archaeological remains and settings, in accordance with Government policy. Where permission for such proposals is granted, the Planning Authority will require the developer to have the site works supervised by a licenced archaeologist.</p> <p>It is Council policy to ensure that archaeological excavation is carried out according to best practice as outlined by the</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
			<p>National Monuments Service, Department of Culture, Heritage and the Gaeltacht, the National Museum of Ireland and the Institute of Archaeologists of Ireland and to protect previously unknown archaeological sites and features, where they are discovered during development works.</p> <p>It is Council policy to ensure the protection and preservation of underwater and terrestrial archaeological sites, both known and potential in riverine or lacustrine locations including wrecks such as the remains of bridges.</p> <p>It is Council policy to require archaeological assessment, including underwater archaeological assessment where relevant, for such developments that due to their location, size or nature may have implications for archaeological heritage. Such developments include those that are located at or close to an archaeological monument or site, those that are extensive in terms of area (0.5 hectares or more) or length (1 kilometre or more and developments that require an Environmental Impact Statement.</p> <p>It is an objective of the Council to protect archaeological sites and monuments, and archaeological objects, which are listed in the Record of Monuments and Places, and to seek their preservation in situ (or at a minimum, preservation by record) through the planning process.</p> <p>Various Provisions relating to Monastic Sites (BHP-41 to 44 and BHO-06)</p> <p>It is Council policy to retain the nominated status of the area comprising the National Monument at Clonmacnoise, enclosing eskers, Mongans Bog, Clonmacnoise callows, Fin Lough and the limestone pavement at Clorhane as the "Clonmacnoise Heritage Zone" in accordance with the recommendations of the study of the area carried out by the Environmental Sciences Unit of Trinity College, Dublin as shown in Figure 10.7 of this Plan.</p> <p>It is Council policy to investigate the potential of Durrow Demesne as a public amenity and tourism asset.</p> <p>It is Council policy to support and promote the protection and appropriate management of all monastic sites in the county.</p> <p>Mass Rocks and Holy Wells</p> <p>It is Council policy to preserve, protect and, where necessary, enhance mass rocks and holy wells in the County.</p> <p>The Council acknowledges the nomination by the Government of Ireland, of two Monastic sites, Clonmacnoise in its own right and Durrow, as a suite of potential sites, on the tentative list for inclusion to the UNESCO World Heritage sites list. It is an objective of the Council to explore the potential of further designating the Monastic Sites at Clonmacnoise and Durrow as prospective UNESCO World Heritage Sites.</p>
Landscape	Occurrence of adverse visual impacts and conflicts with the appropriate protection of designations relating to the landscape.	<p>CAO-05 Seek to improve and promote looped walks along the River Boyne and Grand Canal in conjunction with all stakeholders recognising them as important health and recreation infrastructure within the town.</p> <p>CAP-06 Maintain existing green infrastructure in Edenderry and encourage and facilitate, in consultation with relevant stakeholders, the development of green infrastructure that recognises the synergies that can be achieved with regard to the following:</p> <ul style="list-style-type: none"> • Provision of open space amenities; • Sustainable management of water; • Protection and management of biodiversity; • Protection of cultural heritage; and • Protection of protected landscape sensitivities. 	<p>CAEP-38 (Wind Farms)</p> <p>It is Council policy that in assessing planning applications for wind farms, the Council shall:</p> <p>(a) have regard to the provisions of the Wind Energy Development Guidelines 2006, the Interim Guidelines for Planning Authorities on Statutory Plans, Renewable Energy and Climate Change 2017 and the Draft revised Wind Energy Guidelines 2019 which are expected to be finalised in the near future;</p> <p>(b) have regard to 'Areas Open for Consideration for Wind Energy Developments' in the Wind Energy Strategy Designations Map from the County Wind Energy Strategy;</p> <p>(c) the impact of the proposed wind farm development on proposed Wilderness Corridors as detailed in Objective BLO-28 of Chapter 4;</p> <p>(d) have regard to Development Management Standard 109 on wind farms contained in Chapter 13 of this Plan; and</p> <p>(e) have regard to existing and future international, European, national and regional policy, directives and legislation.</p> <p>REDP-19 (Extractive Industry)</p> <p>It is Council policy to ensure those extractions (quarries / sand and gravel pits) which would result in a reduction of the visual amenity of Areas of High Amenity, eskers, esker landscapes, protected views or damage to designated sites, habitat types or species shall not be permitted. It is Council policy that all such workings should be subjected to landscaping requirements and that worked out quarries should be rehabilitated to a use agreed with the Council which</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
			<p>could include recreational, biodiversity, amenity or other end-of-life uses. Planning applications for extraction shall be assessed against section 28 Ministerial Guidelines. The use of these rehabilitated sites shall be limited to wastes such as soil, stone and subsoils and sites shall be authorised under the appropriate waste regulations. Where the Council considers and accepts that in cases where inert material (for example soil, stones and subsoil) cannot be recycled or otherwise sold, such materials may be considered for the phased restoration and landscaping of the site in line with planning conditions imposed.</p> <p>Various Provisions relating to Landscape (BLP-38 to 42 and BLO-23 to 25) It is Council policy to protect and enhance the county's landscape, by ensuring that development retains, protects and where necessary, enhances the appearance and character of the county's existing landscape. It is Council policy to seek to ensure that local landscape features, including historic features and buildings, hedgerow, shelter belts and stone walls, are retained, protected and enhanced where appropriate, so as to preserve the local landscape and character of an area, whilst providing for future development. It is Council policy to ensure that consideration of landscape sensitivity is an important factor in determining development uses. It is Council policy to require a Landscape/Visual Impact Assessment to accompany significant proposals, located within or adjacent to sensitive landscapes. This assessment will provide details of proposed mitigation measures to address likely negative impacts. It is Council policy to control advertising structures and hoardings in the open countryside. The Council will use its enforcement powers under the Planning and Development Act 2000 (as amended) to secure the removal of unauthorised advertising signs and hoardings including those that are affixed to trailers, wheeled vehicles etc.</p> <p>Landscape It is an objective of the Council to prepare a County Landscape Character Assessment in accordance with all relevant legislation and guidance documents and following the forthcoming National and Regional Landscape Character Assessment. It is an objective of the Council to have regard to the Landscape Sensitivity Areas in Tables 4.18, 4.19 and 4.20 in the consideration of planning applications. It is an objective of the Council to protect skylines and ridgelines from development where such developments will create significant visual intrusion.</p> <p>Various Provisions relating to Protection of Key Scenic Views, Key Prospects and Key Amenity Routes (BLP-43 and BLO-26) It is Council policy to require a Landscape/Visual Impact Assessment to accompany significant proposals that are likely to significantly affect Key Scenic Views and Prospects as listed in Table 4.21 and Key Amenity Routes as listed in Table 4.22. It is an objective of the Council to protect Key Scenic Views and Key Prospects contained in Table 4.21, and Key Amenity Routes as listed in Table 4.22 from inappropriate development.</p> <p>Various Provisions relating to Areas of High Amenity (BLP-35 to 37 and BLO-22) It is Council policy to protect and preserve the county's Areas of High Amenity namely the Slieve Bloom Mountains, Clonmacnoise Heritage Zone, Durrow High Cross, Abbey and surrounding area, the River Shannon, Lough Boora Discovery Park, Grand Canal, Croghan Hill, Raheenmore Bog, Pallas Lake, Clara Bog, Clara eskers, Eiscir Riada and other eskers. Notwithstanding the location of certain settlements, or parts of, for which there are settlement plans (Towns, Villages, Sráids), within the Areas of High Amenity, it is not the intention of this policy to hinder appropriate sustainable levels of development (as set out in the plans and subject to proper planning). Further, it is policy to facilitate the sustainable extension and expansion of existing visitor, tourist related or other rural enterprises within the Areas of High Amenity, where such development is appropriate and where it can be demonstrated that it gives 'added value' to the extending activity and to the immediate area which is the subject of the 'Area of High Amenity' designation. It is Council policy, to ensure that issues of scale, siting, design and overall compatibility (including particular regard to environmental sensitivities) with a site's location within an Area of High Amenity are of paramount importance when assessing any application for planning permission. The merits of each proposal will be examined on a case-by case</p>

Topic	Potentially Significant Adverse Effect, if Unmitigated	Local Area Plan measures, including	Existing Offaly County Development Plan 2021-2027 measures, including
			<p>basis. It is Council policy to support the preparation of a masterplan that conserves and protects the Clonmacnoise monastic site and will co-operate with the Office of Public Works and other stakeholders in its preparation and implementation. It is an objective of the Council to ensure that new development, whether individually or cumulatively, does not impinge in any significant way on the character, integrity and distinctiveness of or the scenic value of the Areas of High Amenity listed in Table 4.17. New development in Areas of High Amenity shall not be permitted if it;</p> <ul style="list-style-type: none"> • Causes unacceptable visual harm; • Introduces incongruous landscape elements; and • Causes the disturbance or loss of (i) landscape elements that contribute to local distinctiveness; (ii) historic elements that contribute significantly to landscape character and quality such as field or road patterns; (iii) vegetation which is a characteristic of that landscape type and (iv) the visual condition of landscape elements.

Section 3 Environmental Report and Submissions/ Observations

3.1 Introduction

This section details how both the Environmental Report and submissions and observations made to Offaly County Council on the Environmental Report and SEA process have been taken into account during the preparation of the Plan and the SEA.

3.2 SEA Scoping Notices and Submissions

As part of the scoping process for preparation of the Plan, environmental authorities⁴ were notified that a submission or observation in relation to the scope and level of detail of the information to be included in the Environmental Report could be made to the Council.

Submissions were made by the following environmental authorities:

- Environmental Protection Agency; and
- Department of Department of Housing, Local Government and Heritage.

The issues raised in these submissions and how these issues have been taken into account during preparation of the Plan and the SEA are provided on Table 3.1 below. Taking into account these submissions included integrating environmental considerations into the Plan, including through the selection of Plan provisions identified on Table 2.1.

⁴ The following authorities were notified: Environmental Protection Agency; Department of Environment, Climate and Communications; Department of Agriculture, Food and the Marine; Department of Housing, Local Government and Heritage; Meath Council; Westmeath County Council; Roscommon County Council; Galway County Council; Tipperary County Council; Laois County Council; and Kildare County Council.

Table 3.1 Taking into account SEA Scoping Submissions

Ref.	Issue raised in submission	SEA Response
1. Submission from the Environmental Protection Agency		
A	We acknowledge your notice, dated 27th September 2022, in relation to the Edenderry Local Area Plan 2023-2029 (the 'Plan'). The EPA is one of the statutory environmental authorities under the SEA Regulations. In our role as an SEA environmental authority, we focus on promoting the full and transparent integration of the findings of the Environmental Assessment into the Plan and advocating that the key environmental challenges for Ireland are addressed as relevant and appropriate to the plan. Our functions as an SEA environmental authority do not include approving or enforcing SEAs or plans.	Noted.
B	As a priority, we focus our efforts on reviewing and commenting on key sector plans. For land use plans at county and local level, we provide a 'self-service approach' via the attached guidance document ' <i>SEA of Local Authority Land Use Plans – EPA Recommendations and Resources</i> '. This document is updated regularly and sets out our key recommendations for integrating environmental considerations into Local Authority land use Plans. We recommend that you take this guidance document into account in preparing the Plan and SEA.	The ' <i>SEA of Local Authority Land Use Plans – EPA Recommendations and Resources</i> ' document has been considered in the preparation of the SEA Scoping Report and will be kept on file for reference throughout the SEA process.
C	In preparing the Plan, Offaly County Council should also ensure that the Plan aligns with key relevant higher-level plans and programmes and is consistent with the relevant objectives and policy commitments of the National Planning Framework and the Regional Spatial and Economic Strategy for the Eastern and Midlands Region.	The SEA will seek to ensure that the Plan aligns with key relevant higher-level plans and programmes and is consistent with the relevant objectives and policy commitments of the National Planning Framework and the Regional Spatial and Economic Strategy for the Eastern and Midland Region.
D	The EPA may provide additional comments upon receipt of the SEA Environmental Report and Draft Plan at the next stage of the SEA process.	Noted.
E	Available Guidance & Resources Our website contains various SEA resources and guidance, including: - SEA process guidance and checklists - Inventory of spatial datasets relevant to SEA - topic specific SEA guidance (including Good practice note on Cumulative Effects Assessment (EPA, 2020), Guidance on SEA Statements and Monitoring (EPA, 2020), Integrating climatic factors into SEA (EPA, 2019), Developing and Assessing Alternatives in SEA (EPA, 2015), and Integrated Biodiversity Impact Assessment (EPA, 2012)) You can access these guidance notes and other resources at: https://www.epa.ie/our-services/monitoring--assessment/assessment/strategic-environmental-assessment/sea-topic-and-sector-specific-guidance/	These resources and guidance have been considered in the preparation of the SEA Scoping Report and will be accessed, as relevant, for reference throughout the SEA process.
F	Environmental Sensitivity Mapping (ESM) Webtool The ESM Webtool is a new decision support tool to assist SEA and planning processes in Ireland. The tool brings together over 100 datasets and allows users to explore environmental considerations within a particular area and create plan-specific environmental sensitivity maps. These maps can help planners anticipate potential land-use conflicts and help identify suitable development locations, while also protecting the environment. The ESM Webtool is available at www.enviromap.ie .	The ESM Webtool has been considered in the preparation of the SEA Scoping report and will be considered throughout the SEA process, where relevant.
G	EPA SEA GIS Search and Reporting Webtool Our SEA GIS Search and Reporting Webtool is publicly available through EPA Maps at https://gis.epa.ie/EPAMaps/SEA . It allows public authorities to produce an indicative report on key aspects of the environment in a specific geographic area. It is intended to assist public authorities in SEA screening and scoping exercises.	Available online EPA resources, including mapping resources, have been considered in the preparation of SEA Scoping report and will be considered throughout the SEA and AA processes.
H	EPA WFD Application Our WFD Application provides a single point of access to water quality and catchment data from the national WFD monitoring programme. The Application is available via www.catchments.ie .	
I	EPA AA GeoTool Our AA GeoTool application has been developed in partnership with the NPWS. It allows users to select a location, specify a search area and gather available information for each European Site within the area. It is also available through EPA https://gis.epa.ie/EPAMaps/AAGeoTool .	
J	State of the Environment Report – Ireland's Environment 2020 In preparing the Plan and SEA, the recommendations, key issues and challenges described within our State of the Environment Report Ireland's Environment – An	The recommendations, key issues and challenges described within the current version of

Ref.	Issue raised in submission	SEA Response
	Assessment 2020 (EPA, 2020) should be considered, as relevant and appropriate to the Plan. This should also be taken into account, in preparing the Plan and SEA.	Ireland's Environment will be considered in the preparation of the Plan and SEA.
K	Transition to a low carbon climate resilient economy and society You should ensure that the Plan/Variation aligns with national commitments on climate change mitigation and adaptation, as well as relevant sectoral, regional and local adaptation plans.	The SEA will seek to ensure that the Plan aligns with national commitments on climate change and adaptation, as well as relevant sectoral, regional and local adaptation plans.
L	Environmental Authorities Under the SEA Regulations, you should consult with: <ul style="list-style-type: none"> • Environmental Protection Agency; • Minister for Tourism, Culture, Arts, Gaeltacht, Sport and Media (formerly Minister for Culture, Heritage and the Gaeltacht (functions transferred from Minister for Environment, Heritage and Local Government/ Minister for Housing, Planning and Local Government to Minister for Culture, Heritage and the Gaeltacht by S.I. 192 of 2011); • Minister for Environment, Climate and Communications (formerly Minister of Communications, Climate Change and the Environment); • Minister for Agriculture, Food and the Marine; and • any adjoining planning authority whose area is contiguous to the area of a planning authority which prepared a draft plan, proposed variation or local area plan 	Notice has been given to relevant environmental authorities as part of the SEA scoping process.
2. Submission from the Department of Housing, Local Government and Heritage		
A	Nature Conservation The Department of Housing Local Government and Housing welcomes the invitation to make a submission in relation to the Edenderry Local Area Plan 2023-2029 Issues Paper. The following observations are made by the Department in its role as a statutory authority with overarching responsibility for nature conservation and the nature directives (i.e. the Bird Directive (2009/147/EC) and Habitats Directive (92/43/EEC)). The observations are not exhaustive but are intended to assist the planning authority in meeting its obligations in relation to nature conservation, European sites, biodiversity and environmental protection in the process of reviewing and preparing the Edenderry Local Area Plan 2023-2029, hereafter referred to as the LAP.	Noted.
B	1. Nature Conservation Policy Ireland has ratified the United Nations (UN) Convention on Biological Diversity, and all subsequent protocols, is a signatory to the UN Sustainable Development Goals (SDGs) and is fully committed to halting the loss of biodiversity and the degradation of ecosystem services as set out in the EU Biodiversity Strategy for 2030. Government policy on nature conservation is outlined in the National Biodiversity Action Plan 2017-2021 (NBAP) which includes Ireland's vision for biodiversity 'That biodiversity and ecosystems in Ireland are conserved and restored, delivering benefits essential for all sectors of society and that Ireland contributes to efforts to halt the loss of biodiversity and the degradation of ecosystems in the EU and globally.' Regional Strategic Outcome 11 of the Regional Spatial & Economic Strategy (RSES) for the Eastern and Midland Region (EMRA) sets out the regional commitment to 'Promote co-ordinated spatial planning to conserve and enhance the biodiversity of our protected habitats and species including landscape and heritage protection'. This commitment is echoed in the Strategic Vision of the Offaly County Development Plan 2021 – 2027 which is 'To create a sustainable and competitive county that supports the health and wellbeing of our people and places, from urban to rural, with access to employment opportunities supported by high quality housing and physical, social and community infrastructure for all, in a climate resilient manner and with respect for our biodiversity.' The Department advises that these policy commitments to biodiversity conservation must be reflected in the LAP.	Biodiversity policy will be considered in the preparation of the Plan and in the undertaking of the associated assessments.
C	2. Nature Conservation within the LAP The recent Covid-19 pandemic has highlighted the value of biodiversity in relation to our physical and mental wellbeing. There is an urgent need to protect our natural resources for present and future generations. A Local Area Plan that has biodiversity embedded in its core policies will help build a town that is a healthy place for its people and visitors as well as providing fully functioning and resilient ecosystems. It is important that the LAP sets out the legislative requirements in relation to the protection of designated sites and protected species under both European (i.e. Birds and Habitats Directive) and national legislation (i.e. Wildlife Act 1976-2021) and must ensure government policy on biodiversity can be delivered at local level. Objective 1 of the NBAP is to 'Mainstream biodiversity into decision-making across all sectors'. There are real opportunities to protect and enhance biodiversity when considered at strategic level. The Department would recommend that biodiversity is integrated into all sections of the LAP and that policies and	Biodiversity related legislation will be considered in the preparation of the Plan and in the undertaking of the associated assessments. Measures contributing towards the protection and management of biodiversity will be integrated into the Plan.

Ref.	Issue raised in submission	SEA Response
	objectives that undermine or are in direct conflict with natural heritage policies and objectives are avoided. The current LAP's policies and objectives should be reviewed with a view to streamlining and strengthening them and ensuring that they are consistent with current EU and National plans, reports, guidance documents and case law relating to biodiversity.	
D	The Department notes the planning authority's existing commitment to biodiversity protection in the current LAP 2017-2023. The planning authority should build on this commitment and seek to strengthen biodiversity protection within the LAP area and its zone of influence. The Department would recommend that natural heritage objectives are clear and robust, and that there is an objective to protect, conserve and enhance biodiversity both within and outside protected sites. This will be critical if the planning authority is to meet its obligations on nature conservation and Ireland meets its target to halt the loss of biodiversity. Objective 1.1.3 of the NBAP requires all Public Authorities and private sector bodies 'move towards no net loss of biodiversity through strategies, planning, mitigation measures, appropriate offsetting and/or investment in Blue-Green infrastructure'. The Department advises the inclusion of a 'no net loss' biodiversity target for all developments, activities, programmes and plans arising from this LAP. The Department advises that objectives related to biodiversity and ecosystem conservation, protection, enhancement and restoration should be separated from objectives related to other matters such as amenity provision and landscape in the LAP. This will assist the planning authority in securing and monitoring the implementation of the LAP's policies and objectives and in the Department's monitoring of the NBAP which includes the performance indicator 'Number of explicit policies and objectives for biodiversity and ecosystem services in County Development Plans and other local plans per Local Authority'.	Measures contributing towards the protection and management of biodiversity will be integrated into the Plan and this advice from the Department will be considered when preparing these measures.
E	<p>Nature Conservation Threats and Pressures</p> <p>Clear and robust objectives are required to ensure the strict protection of all bat species and otter, species listed under Annex IV species under the European Communities (Birds and Natural Habitats) Regulations, 2011 to 2021. The recent Department publication '<i>Guidance on the Strict Protection of Certain Animal and Plant Species under the Habitats Directive in Ireland</i>', should be consulted. The Department advises that plans and projects relating to the restoration and re-use of historic buildings must be accompanied by a bat survey report. The Department recommends that Lighting objectives are included within the LAP. Reported declines in insect populations have sparked global concern, with artificial light at night (ALAN) identified as a potential contributing factor. Recent scientific evidence indicates that ALAN and the ongoing shift toward white LEDs (i.e., from narrow- to broad-spectrum lighting) will have substantial consequences for insect populations and ecosystem processes. The Department advises that there should be a presumption against the lighting of entire footpaths and cycle tracks, in areas with low or no levels of background light. The Department would like to highlight the EUROBATS, Dark Sky Ireland and Institute of Lighting Professions lighting recommendations which provide further information on reducing the impact of lighting on wildlife. The town's swift population is a significant biodiversity asset. The swift is an urban bird species of conservation concern in Ireland. The Department recommends that swift conservation measures are included in the LAP. The planning authority should consider an objective that all new public buildings consider swift nest bricks/boxes during the planning stage. The planning authority should include swifts as a monitoring species in the LAP. Furthermore Strategic Environmental Assessment of the LAP must use existing information about swifts and consider the scenarios of potential disturbance from new developments and consider new developments as an option to stabilise the swift population. The Department would welcome the inclusion of a policy where all public buildings within the LAP area incorporate other positive biodiversity measures as standard practice. Actions could include simple measures, e.g. the creation of wildlife habitats on public open spaces to more ambitious measures that will ensure 'biodiversity net gain'. Furthermore, there is an opportunity for the planning authority to enhance biodiversity by including objectives, for example, to map the extent of hedgerows in the LAP area, plant hedgerows to connect gaps in these corridors, include a pollinator plan for the LAP area or remove culverts and other restrictions from drains. Invasive species management and control (terrestrial and aquatic) measures should also be considered (where appropriate).</p>	Measures contributing towards the protection and management of biodiversity will be integrated into the Plan and this advice from the Department will be considered when preparing these measures. The SEA Environmental Report will identify that the town has a significant swift population.

Ref.	Issue raised in submission	SEA Response
F	<p>Green Infrastructure (GI)</p> <p>The Department would welcome a commitment in the LAP to the preparation of an overall Green Infrastructure Strategy for the LAP area. To the south of the town lies the Grand Canal which runs in an east to west direction. The Edenderry line branches from the main channel into the centre of town. Both the Grand Canal and the Edenderry branch are designated as a proposed Natural Heritage Area and are important GI. A distinction should be made between GI and greenways, blueways and peatways within the LAP. As advised in the National Greenway Strategy, greenways and other associated linear trails should be designed to take into account, and avoid where necessary, the sensitivities of natural heritage. Whilst the development of greenways, blueways and peatways is welcomed, the same risks to biodiversity can be associated with these type of trails, as with any other road development, and the Department would recommend the need for Ecological Impact Assessment of any such proposal. The Department would recommend the inclusion of clear objectives with regard to the identification and protection of trees, hedgerows and other habitats, as well as wetlands and flood zones which contribute to GI in the LAP area. There should be a clear commitment made to protecting the ecological integrity of the Grand Canal proposed Natural Heritage Area and to ensuring that development does not have a significant adverse effect on this site. The Department recommends the inclusion of riparian buffer zones as outlined in the Inland Fisheries Ireland Guidance <i>'Planning for Watercourses in the Urban Environment (2020)'</i> in the GI Strategy for the town and the LAP.</p>	<p>Measures contributing towards the protection and management of biodiversity will be integrated into the Plan and this advice from the Department will be considered when preparing these measures.</p>
G	<p>Water</p> <p>The River Boyne runs along the northeast boundary of Edenderry Town and is hydrologically connected to the town by Weaver's Drain. This drain flows northwards from the town passing through a number of culverts along the way before discharging to the Boyne to the north. Both the River Boyne and Weavers Drain are considered 'At Risk' water bodies⁶. Latest Q values at Kinnafad Bridge downstream of the town in 2020 indicate that the river is in poor ecological condition. The planning authority should include objectives which contribute to an improvement of water quality in both Weaver's Drain and the River Boyne. Nature-based Sustainable Drainage (SuDs) measures which favour biodiversity should be encouraged. The design of SuDS is best addressed at a macro level and consolidated solutions should be examined which allow for the aggregation of volumes in larger parks and open spaces rather than a fragmented and phased approach. This is particularly relevant to Edenderry, given its issues with water quality and would tie in with the objective of the current LAP <i>'SWD01 To upgrade and extend the surface water collection system for the town'</i>. The Department advises that strategic Nature-based SuDs measures should be considered as part of the LAP and in this regard would draw the planning authority's attention to the Department's recently published Best Practice Interim Guidance Document <i>'Nature-based Solutions to the Management of Rainwater and Surface Water Runoff in Urban Areas, Water Sensitive Urban Design (2021)'</i>.</p>	<p>Measures contributing towards the protection and management of water will be integrated into the Plan and this advice from the Department will be considered when preparing these measures. The information provided under this point will be considered by the SEA and AA processes being undertaken alongside the preparation of the Plan.</p>
H	<p>Climate Change</p> <p>An objective of Ireland's Biodiversity Climate Change Sectoral Adaptation Plan 2019 is to <i>'Protect, restore and enhance biodiversity to increase the resilience of natural and human systems to climate change'</i>. This objective is particularly relevant to all wetland habitats and flood plains which provide an essential service in relation to flood alleviation. The Department recommends objectives to ensure that undesignated wetland areas and flood plains are protected within the LAP area. The Department would welcome consideration of the rehabilitation of cutaway peatlands within the LAP area which would 'lock-up' carbon stored in such peatlands.</p>	<p>Measures relating to flood risk management and climate action will be integrated into the Plan and this advice from the Department will be considered when preparing these measures.</p>
I	<p>Monitoring the impacts of the LAP on biodiversity</p> <p>The LAP will be subject to environmental assessments and the Department advises that particular attention should be placed on the requirements of Article 10 of the Strategic Environmental Assessment (SEA) Directive 2001/42/EC, whereby Member States are required to monitor the significant environmental effects of the implementation of plans. Monitoring during LAP implementation should allow for corrective action and intervention if environmental damage is noted and will provide a learning opportunity for practitioners and decision makers for future land use plans. Monitoring can use existing sources of information including data collected by other government departments or agencies but the loss or enhancement of biodiversity due to development can only be adequately monitored and recorded through the planning process. For example, the Department would welcome a commitment to monitoring the swift population within the LAP's zone of influence in the SEA. The Department would welcome a clear and specific monitoring plan to be included with the Strategic Environmental Report that would clearly outline how it is proposed to record the impacts of LAP implementation on biodiversity, both in terms of biodiversity loss and biodiversity enhancement during the lifetime of the LAP.</p>	<p>The SEA will include measures for monitoring the likely significant environmental effects of implementing the Plan.</p>

3.3 Submissions on the Environmental Report for the Draft Plan

Various submissions were made on the Draft Plan, Proposed Material Alterations and/or associated environmental assessment documents while these documents were on public display.

Updates made on foot of submissions include:

- Insert the following text as a footnote into Table 10.1 "Indicators, Targets, Sources and Remedial Action" of the SEA Environmental Report: "Indicators are linked to and should be considered alongside the environmental effects outlined in Table 8.3 and proposed mitigation measures outlined in Table 9.1."
- Insert the following text as a footnote into Table 10.1 "Indicators, Targets, Sources and Remedial Action" of the SEA Environmental Report: "Including confirmation with development management that the following impacts have been considered and including use of monitoring data, where available: habitat loss; disturbance (e.g. due to noise and lighting along transport corridors) and 'displacement of protected species such as birds and bats."
- Insert the following text into Section 10 of the SEA Environmental Report: Monitoring frequencies of indicators tend to change although where they are consistent frequencies are identified.
- In Section 10 of the SEA Environmental Report, replace "Department of Culture, Heritage and the Gaeltacht National Monitoring Report for the Birds Directive under Article 12 (every 3 years)." with "Department of Housing, Local Government and Heritage National Monitoring Report for the Birds Directive under Article 12 (every 6 years)."
- Insert the following text into Section 10 of the SEA Environmental Report: "The methodology for monitoring set out below will be undertaken by the Council. Where monitoring beyond existing sources is to be undertaken, it is recommended that industry standard methods are used where they exist and where appropriate."
- Insert the following text into a new Section 7.4 "Selected Alternatives" in the SEA Environmental Report: "Selected alternatives for the Plan from each of the four tiers of alternatives that emerged from the planning/SEA process are indicated above. These alternatives have been adopted by the Members having regard to both: 1. The environmental effects which were identified by the SEA and are detailed above; and 2. Planning - including social and economic - effects that also were considered by the Members."

- To identify under Section 2.4 "Flood Risk Indicators" in the SFRA report that: "The PFRA indicative flood maps have now been superseded by the recently published NIFM. There is no national indicative fluvial flood mapping available within the Plan area, although there are extents for this dataset in close proximity outside of the Plan area."
- To insert details on the Flood Risk Management Justification Test into Section 4 of the SFRA Report.
- In the SFRA Report to present Table 5 as Table 6 is presented and to complete DMO-106 Flood Risk Assessments.

For further information on how submissions were considered, refer to the Chief Executive's Report on submissions received on the Draft Plan and associated documents and the Chief Executive's Report on submissions received on the Proposed Material Alterations and associated documentation – both available at <https://www.offalycoco.ie/>.

All parts of the Plan-preparation process were informed by the SEA, AA and SFRA processes - this includes the preparation of the Draft Plan, Proposed Material Alterations and Further Modifications. The mitigation integrated into the final, adopted Plan includes that identified at Table 2.1 of this report.

3.4 SEA documents including SEA Environmental Report

The Draft Plan and accompanying documents (including SEA Environmental Report and AA and SFRA documents) were placed on public display, having integrated various recommendations arising from the SEA, AA and SFRA processes. Responses to submissions made during the public display of the Draft Plan and associated SEA, AA and SFRA documents were integrated into a Chief Executive's Report and considered by Offaly County Council.

A number of material alterations were proposed after public display of the Draft Plan. The Proposed Material Alterations were subject to SEA and Stage 2 AA AA. Responses to submissions made during the public display of the Proposed Material Alterations and associated SEA, AA and SFRA documents were integrated into a Chief Executive's Report and considered by Offaly County Council. Further

modifications were considered by the SEA, AA and SFRA processes.

On adoption of the Plan, the Environmental Report that had been placed on public display alongside the Draft Plan was updated to become a final Environmental Report that is consistent with the adopted Plan, taking into account all changes that were made to the original Draft Plan that was placed on public display.

Section 4 Summary of Alternatives considered

4.1 Introduction

The SEA Directive requires that reasonable alternatives (taking into account the objectives and the geographical scope of the plan or programme) are identified, described and evaluated for their likely significant effects on the environment. Summaries of the alternatives for the Plan and their assessment are provided below.

4.2 Limitations in Available Alternatives

The Plan is required to be prepared by the existing, already in force, Offaly County Development Plan 2021-2027 and the Planning and Development Act 2000 (as amended), which specifies various types of objectives that must be provided for by the Plan.

The alternatives available for the Plan are significantly limited by the provisions of higher-level planning objectives, including those of the National Planning Framework (NPF), the Regional Spatial and Economic Strategy (RSES) for the Eastern and Midland Region and the County Plan. These documents set out various requirements for the content of the Plan including on topics such as land use zoning and the sustainable development of settlements.

4.3 Type 1: Alternatives Already Considered

The preparation of the County Development Plan and associated SEA process already considered various different types of alternatives, including those relating to population allocations, which were integrated into that Plan and which set requirements for lower tier planning in the County, including the Edenderry Local Area Plan.

4.4 Type 2: Land Use Zoning Alternatives

Alternative Type 2 (i): "More Compact Development"

The more compact, serviced/serviceable land and infrastructure assessment approach under this alternative would allow for water supply, waste water, compact growth, public transport and co-ordinated development considerations to be integrated into the Plan to the highest degree.

The infrastructure required to be in place to achieve the growth targets is already in place or planned under this alternative.

The development of the Town Centre and the Core Retail Area would be more compact and sustainable under this scenario and would support the longer-term viability of the settlement.

Opportunity sites identified with clear design and proposed uses identified – making successful applications for the sustainable, compact development of the town more likely.

The approach under Alternative Type 2 (i): "More Compact Development" would benefit the protection of various environmental components. Although potentially adverse effects associated with land use development would exist, they would be mitigated to a significant degree.

Alternative Type 2 (ii): "Less Compact Development"

By not following a more compact, serviced/serviceable land and infrastructure assessment approach, this alternative would not allow for water supply, waste water, compact growth, public transport and co-ordinated development considerations to be integrated into the Plan to the highest degree.

Additional infrastructure would be required to accommodate sporadic development, more than would be required for Alternative 1 'More Compact Development' and some development may have to be serviced by private waste water treatment systems which would have to be properly maintained.

The development of the Town Centre and the Core Retail Area would be less compact and less sustainable under this scenario and would not optimally support the longer-term viability of the settlement.

Opportunity sites are identified but no clear guidance on the design parameters or uses identified – making successful applications for the sustainable, compact development of the town less likely.

An opportunity to mitigate potentially adverse effects arising from land use development to a significant degree would have been missed by the approach under Alternative Type 2 (ii): "Less Compact Development".

Selected Alternative: Type 2 (i): "More Compact Development"

4.5 Type 3: Alternatives for Transport

Type 3 (i) Low Carbon Corridor

Supporting the use of a low carbon Edenderry-Enfield rail-line corridor within the Plan boundary (Type 3 (i) Alternative A) would make the use of this corridor for sustainable modes of transport more likely. This would be likely to improve the potential for meeting important objectives relating to emissions/energy objectives. Applications for such development would be more likely to be granted permission. Project level consideration of environmental impacts and mitigation, including those relating to construction, would need to take place in the context of more detail around potential proposals.

Not explicitly supporting the use of a low carbon Edenderry-Enfield rail-line corridor within the Plan boundary, would make the use of this corridor for sustainable modes of transport less likely and make its redundant state more likely. This would be likely to reduce the potential for meeting important objectives relating to emissions/energy objectives. Applications for such development would be less likely to be granted permission. Project level consideration of environmental impacts and mitigation, including those relating to construction, would need to take place in the context of more detail around potential proposals.

Selected Alternative: Alternative A

Type 3 (ii) Roadspace Capacity

These alternatives would have the potential to change behaviours and would influence the profile of users of the urban centre and mode share of transport. Reallocating roadspace within Edenderry to walking, cycling and public transport to accompany / occur concurrently with the provision of any additional roadspace capacity that may arise in the future (Type 3 (ii) Alternative A) could take the form of removing traffic from streets, removing lanes of traffic, narrowing carriageways, traffic management measures, or removing on-street parking

to provide cycle tracks or widened footpaths. This would benefit efforts to maximise sustainable mobility. This would also facilitate the enhancement of the public realm (including cultural heritage and its context) by contributing towards the replacement of motorised transport modes with more sustainable and non-motorised modes. Project level consideration of environmental impacts and mitigation, including those relating to construction, would need to take place in the context of more detail around proposals. To not accompany the development of additional roadspace capacity by a corresponding reallocation of roadspace within Edenderry to walking, cycling and public transport (Type 3 (ii) Alternative B) would not benefit efforts to maximise sustainable mobility.

Selected Alternative: Alternative A

Type 3 (iii) How to provide transport infrastructure

The provision of new transport infrastructure, with all additional environmental mitigation left to be defined until project level (Type 3 (iii) Alternative A) would offer the least certainty for environmental protection and management and would be more likely to result in important individual projects (relating to sustainable mobility and emissions objectives) not getting permission.

Specifying environmental constraints (including those related to habitats and potential impacts such as disturbance from lighting – e.g. minimising river crossings, avoiding sensitive habitats, not increasing barriers to flood waters and sustainable design and construction techniques) at Plan level (Type 3 (iii) Alternative B) would offer the most certainty for environmental protection and management and would be more likely to result in important individual projects (relating to sustainable mobility and emissions/energy objectives) receiving permission.

Selected Alternative: Alternative B

4.6 Selected Alternatives

Selected alternatives for the Plan from each of the three types of alternatives that emerged from the planning/SEA process are indicated above.

These alternatives have been adopted by the Members having regard to both:

1. The environmental effects which were identified by the SEA and are summarised above; and
2. Planning - including social and economic - effects that also were considered by the Members.

Section 5 Monitoring Measures

5.1 Introduction

The SEA Directive requires that the significant environmental effects of the implementation of plans and programmes are monitored. This section details the measures which will be used in order to monitor the likely significant effects of implementing the Plan.

Monitoring can both demonstrate the positive effects facilitated by the Plan and can enable, at an early stage, the identification of unforeseen adverse effects and the undertaking of appropriate remedial action.

The occurrence of significant adverse environmental effects not predicted and mitigated by this assessment, which are directly attributable to the implementation of the Plan, would necessitate consideration of these effects in the context of the Plan and potential remediation action(s) and/or review of part(s) of the Plan.

5.2 Indicators and Targets

Monitoring is based around indicators which allow quantitative measures of trends and progress over time relating to the Strategic Environmental Objectives that were used in the evaluation. Each indicator to be monitored is accompanied by the target(s) which were identified with regard to the relevant strategic actions. Given the position of the Local Area Plan in the land use planning hierarchy beneath the Offaly County Development Plan 2021-2027, the measures identified in that County Development Plan SEA have been used as they are or having been slightly modified – in most instances. This consistency across the hierarchy of land use plans will improve the efficiency and effectiveness of future monitoring.

Table 5.1 shows the indicators and targets which have been selected for monitoring the likely significant environmental effects of implementing the Plan, if unmitigated.

Monitoring is an ongoing process and the programme allows for flexibility and the further refinement of indicators and targets. The Monitoring Programme may be updated to

deal with specific environmental issues – including unforeseen effects – as they arise.

5.3 Sources

The Plan forms part of the wider land use planning framework comprising a hierarchy of policies, plans, programmes, etc. This wider framework, including the National Planning Framework, the Eastern and Midland RSES and the Offaly County Development Plan is subject to its own SEA (and associated monitoring) requirements. Individual projects will be subject to their own monitoring requirements as relevant.

In implementing the Monitoring Programme, the Council will take into account this hierarchy of planning and environmental monitoring.

Sources for indicators may include existing monitoring databases (including those maintained by planning authorities and national/regional government departments and agencies) and the output of lower-tier environmental assessment and decision making (including a review of project approvals granted and associated documents and the output of any EIA monitoring programmes).

Internal monitoring of the environmental effects of grants of permission in the Council would provide monitoring of certain indicators on a *grant of permission*⁵ basis. Where significant adverse effects as a result of the development to be permitted are identified, such effects could be identified, recorded and used to inform monitoring evaluation.

⁵ The likely significant effects of development proposals on environmental sensitivities are further determined during the development management process. Documenting any identified effects as a result of a development to be permitted can help to fulfill monitoring requirements.

5.4 Reporting

A stand-alone Monitoring Report on the significant environmental effects of implementing the Plan will be prepared in advance of the beginning of the review of the Plan. Monitoring frequencies of indicators tend to change although where they are consistent frequencies are identified. This report should address the indicators set out on Table 5.1.

Monitoring frequencies of indicators tend to change although where they are consistent frequencies are identified.

The methodology for monitoring set out below will be undertaken by the Council. Where monitoring beyond existing sources is to be undertaken, it is recommended that industry standard methods are used where they exist and where appropriate.

Interim reporting may be undertaken as part of reporting on the County Development Plan and other Local Area Plans.

The Council is responsible for the ongoing review of indicators and targets, collating existing relevant monitored data, the preparation of monitoring evaluation report(s), the publication of these reports and, if necessary, the carrying out of remedial action.

Table 5.1 Indicators, Targets, Sources and Remedial Action

Environmental Component	SEO Code	Indicators	Targets	Sources	Remedial Action
Biodiversity, Flora and Fauna	BFF	<ul style="list-style-type: none"> • Condition of European sites • Number of spatial plans that have included ecosystem services content, mapping and policy to protect ecosystem services when their relevant plans are either revised or drafted • SEA and AA as relevant for new Council policies, plans, programmes etc. • Status of water quality in the County's water bodies • Compliance of planning permissions with Plan measures providing for the protection of Biodiversity and flora and fauna – see County Development Plan Chapter 4 "Biodiversity and Landscape" and Local Area Plan Chapter 6 "Biodiversity and Green Infrastructure" 	<ul style="list-style-type: none"> • Require all local level land use plans to include ecosystem services and green/blue infrastructure provisions in their land use plans and as a minimum, to have regard to the required targets in relation to the conservation of European sites, other nature conservation sites, ecological networks, and protected species • Implement and review, as relevant, the Biodiversity Plan for Offaly as incorporated into the Offaly Heritage Plan 2017-21 • For planning permission to be only granted when applications demonstrate that they comply with all Plan measures providing for the protection of biodiversity and flora and fauna – see County Development Plan Chapter 4 "Biodiversity and Landscape" and Local Area Plan Chapter 6 "Biodiversity and Green Infrastructure" 	<ul style="list-style-type: none"> • Department of Housing, Local Government and Heritage report of the implementation of the measures contained in the Habitats Directive - as required by Article 17 of the Directive (every 6 years). • Department of Housing, Local Government and Heritage National Monitoring Report for the Birds Directive under Article 12 (every 6 years) • Internal monitoring of preparation of local land use plans • Internal monitoring of likely significant environmental effects of grants of permission (grant by grant).⁶ • Consultations with the NPWS (at monitoring evaluation - see Section 5.4) 	<ul style="list-style-type: none"> • Where condition of European sites is found to be deteriorating this will be investigated with the Regional Assembly and the DHLGH to establish if the pressures are related to Plan actions / activities. A tailored response will be developed in consultation with these stakeholders in such a circumstance. • Where water bodies are failing to meet at least good status this will be investigated with the DHPLG Water Section, the Regional Assembly, the EPA Catchment Unit and, as relevant, Irish Water to establish if the pressures are related to Plan actions / activities. A tailored response will be developed in consultation with these stakeholders in such a circumstance.
Population and Human Health	PHH	<ul style="list-style-type: none"> • Implementation of Plan measures relating to the promotion of economic growth as provided for by County Development Plan Chapter 5 "Economic Development Strategy" and Local Area Plan Chapter 2 "Economic Development Strategy" • Number of spatial concentrations of health problems arising from environmental factors resulting from development permitted under the Plan • Proportion of people reporting regular cycling / walking to school and work above 2016 CSO figures • Number of spatial plans that include specific green infrastructure mapping 	<ul style="list-style-type: none"> • For review of progress on implementing Plan objectives to demonstrate successful implementation of measures relating to the promotion of economic growth as provided for by County Development Plan Chapter 5 "Economic Development Strategy" and Local Area Plan Chapter 2 "Economic Development Strategy" • No spatial concentrations of health problems arising from environmental factors as a result of implementing the Plan • Increase in the proportion of people reporting regular cycling / walking to school and work above 2016 CSO figures. • Implementation of Green Infrastructure 	<ul style="list-style-type: none"> • Internal review of progress on implementing Plan objectives • Consultations with the Health Service Executive and EPA • CSO data • Internal monitoring of preparation of local land use plans 	<ul style="list-style-type: none"> • Where planning applications in key growth towns are rejected due to insufficient capacity in the waste water treatment plant or failure of the waste water treatment plant to meet Emission Limit Values, the Council will contribute towards a response with the Regional Assembly, EPA and Irish Water to achieve the necessary capacity. • Where proportion of population shows increase in private car use above previous CSO figures, the Council will coordinate with the Regional Assembly, the DHPLG, DECC and NTA to develop a tailored response.
Soil (and Land)	S	<ul style="list-style-type: none"> • Proportion of population growth occurring on infill and brownfield lands compared to greenfield • Volume of contaminated material generated from brownfield and infill • Number of AA determinations and environmental assessments 	<ul style="list-style-type: none"> • Maintain built surface cover nationally to below the EU average of 4% as per the NPF. • Achieve the 40% target for growth on infill as per the NPF. 	<ul style="list-style-type: none"> • Environmental Protection Agency (EPA), Geoportal • Internal monitoring of likely significant environmental effects of grants of permission (grant by grant) 	<ul style="list-style-type: none"> • Where the proportion of growth on infill and brownfield sites is not keeping pace with the targets set in the NPF and the RSES, the Council will liaise with the Regional Assembly to establish reasons and coordinate actions to address constraints to doing so.

⁶ Including confirmation with development management that the following impacts have been considered and including use of monitoring data, where available: habitat loss; disturbance (e.g. due to noise and lighting along transport corridors) and 'displacement of protected species such as birds and bats.

Environmental Component	SEO Code	Indicators	Targets	Sources	Remedial Action
		undertaken to support applications for brownfield and infill development prior to planning permission			
Water	W	<ul style="list-style-type: none"> • Status of water bodies as reported by the EPA Water Monitoring Programme for the WFD • Number of incompatible developments permitted within flood risk areas 	<ul style="list-style-type: none"> • Not to cause deterioration in the status of any surface water or affect the ability of any surface water to achieve 'good status' • Implementation of the objectives of the second cycle of the River Basin Management Plan (and subsequent iterations as relevant) • Minimise developments granted permission on lands which pose - or are likely to pose in the future - a significant flood risk 	<ul style="list-style-type: none"> • EPA Monitoring Programme for WFD compliance • Internal monitoring of likely significant environmental effects of grants of permission (grant by grant) 	<ul style="list-style-type: none"> • Where water bodies are failing to meet at least good status this will be investigated with the DHPLG Water Section, the EPA Catchment Unit, the Regional Assembly and, as relevant, Irish Water to establish if the pressures are related to Plan actions / activities. A tailored response will be developed in consultation with these stakeholders in such a circumstance. • Where planning applications in key growth towns are rejected due to insufficient capacity in the Waste water treatment Plant or failure of the plant to meet Emission Limit Values, the Eastern and Midland Regional Assembly will coordinate a response between the relevant local authority, EPA and Irish Water to achieve the necessary capacity. • The Council will engage, as relevant, with the Eastern and Midland Regional Assembly and the OPW with respect to planning applications for development in areas of elevated flood risk.
Material Assets	MA	<ul style="list-style-type: none"> • Programmed delivery of Irish Water infrastructure for all key growth towns in line with Irish Water Investment Plan and prioritisation programme to ensure sustainable growth can be accommodated • Number of new developments granted permission which can be adequately and appropriately served with waste water treatment over the lifetime of the Plan • Proportion of population within who report regular cycling / walking to school and work above 2016 CSO figures 	<ul style="list-style-type: none"> • To map brownfield and infill land parcels across the County. • All new developments granted permission to be connected to and adequately and appropriately served by waste water treatment over the lifetime of the Plan • Where septic tanks are proposed, for planning permission to be only granted when applications demonstrate that the outfall from the septic tank will not – in combination with other septic tanks – contribute towards any surface or ground water body not meeting the objective of good status under the Water Framework Directive • Increased budget spends on water and waste water infrastructure • By 2020 all citizens will have access to speeds of 30Mbps, and that 50% of citizens will be subscribing to speeds of 100Mbps 	<ul style="list-style-type: none"> • Internal monitoring of likely significant environmental effects of grants of permission (grant by grant) • CSO data • Consultations with Irish Water (at monitoring evaluation - see Section 5.4) • Department of Housing, Planning and Local Government in conjunction with Local Authorities • Department of Communications, Climate Action and Environment • Department of Public Expenditure and Reform 	<ul style="list-style-type: none"> • Where planning applications in key growth towns are rejected due to insufficient capacity in the waste water treatment plant or failure of the waste water treatment plant to meet Emission Limit Values, the Council will coordinate a response between the Regional Assembly, EPA and Irish Water to achieve the necessary capacity. • Where proportion of population shows increase in private car use above previous CSO figures, the Council will coordinate with the Regional Assembly, DHPLG and NTA to develop a tailored response.

SEA Statement for the Edenderry Local Area Plan 2023-2029

Environmental Component	SEO Code	Indicators	Targets	Sources	Remedial Action
Air	A	<ul style="list-style-type: none"> Proportion of journeys made by private fossil fuel-based car compared to 2016 National Travel Survey levels of 74% NO_x, SO_x, PM10 and PM2.5 as part of Ambient Air Quality Monitoring 	<ul style="list-style-type: none"> Decrease in proportion of journeys made by private fossil fuel-based car compared to 2016 National Travel Survey levels. Improvement in Air Quality trends, particularly in relation to transport related emissions of NO_x and particulate matter 	<ul style="list-style-type: none"> CSO data Data from the National Travel Survey EPA Air Quality Monitoring Consultations with Department of Transport Tourism and Sport, Transport Trends and Department of the Environment, Climate and Communications (at monitoring evaluation - see Section 5.4) 	<ul style="list-style-type: none"> Where proportion of population shows increase in private car use above previous CSO figures, Council will coordinate with the Regional Assembly, DHPLG, DECC and NTA to develop a tailored response.
