

To Offaly County Council, I want to submit my objection to your wind strategy - Area 5 MA433 and MA436 at Leamongahan bog and urge you to remove it as a possible location for wind turbines. It seems incredible that you seem intent on destroying the countryside of the county you pretend to represent. The truth is you have no idea how to create jobs for the county, the roads are a disgrace and your clinging to the wind farms as you have no plan B. You are every bit a carbon copy of the current and previous governments, too many of the same faces in the chair for too long, your only plan is to fill every field in Offaly with wind turbines( except the ones near your house) and hope for the best. Time to take of the green tinted glasses and maybe earn your title as a councilor.
